All illustrations have been mounted with LectroStik adhesive wax and are removable by heating. The wax melts at 175° F, but is otherwise permanent. Keep this book away from high heat to avoid accidentally loosening the illustrations.

\*Except as noted:

The illustrations in this book are the originals of artworks reproduced in the Mineralogical Record magazine.

Wendell De Jeloon

Jo my mother
Lorraine Haseman Wilson
(1921-1992)
Who knew what it meant
to be an artist

Dineral collectors, being appreciators of the unique beauty of crystallized mineral specimens, tend to be a visually oriented lot. That is why the task of being editor of The Mineralogical Record called for an emphasis on illustration as well as technical content. This was and is a happy requirement for me because, up until my second year of college, I had always assumed that I would make my living as an artist. I came to realize, however, that putting food on the table through the production and sale of art would be a grueling and undependable process which would turns what has always been a pleasurable pasttime into forced brudgery. Consequently I shifted my studies to my other passions, Mineralogy, and graduated with the equivalent of an art/geology souble major. There were, at that time, no immediate job prospects, so I continued on in grabnate school until receiving my Doctoral degree in 1977. It was then that I was hired to take over the editorship of the enagazine. CHO Even before becoming

editor, however, my inclination had becomes well-known in mineral circles, and I was commissioned to make pen-and-ink drawings of fine mineral specimens for the advertisements of Sealers such as Gary Hansen, Gene Schlepp, Bill Larson, Dave Wilber and Jack Lowell. In those days, s color photography inside the magazine was prohibitively expensive, so dealers embellished their ads with artful pen-and-inko renderings which reproduced well in blackand-white. In recent times the call for this kind of art has dwindled as colore photography has become more affordable. It pleases me to gather together here 100 of the most important or interesting pieces of my own art thats have appeared in or been prepared for The Mineralogical Record Suring the last 25 years or so. Some are only partially my work, being based in part on old engravings or simply being handcolored by me. Not included are several oil paintings and watercolors which the reader is invited to search out in the magazine, inclu-

ding the 79 mine wulfenite (cover of vol. 3, no.6), the Rowley mine wulfenite (vol. 5, no. 1, page 30), the Tsume's mimetite (back cover of vol. 8, no.3), and the Mexican calcite (vol. 24, no. 6, page 459). Although this book is limited to my own art, the work of other mineral artists has occasionally appeared in thes magazine as well. Surely the most talented was Tom Daugherty, a mineral dealer and former cartoonist whose specimen sketches appeared in his ass in 1973-1975. Being an artist by personality, I tend to think of The Mineralogical Record as one big artwork which musts be visually rich and well-coordinated throughout. The drawings in this book have played a part in achieving that goal and have, I hope, contributed to the enjoyment of every reader.

Wendell E. Wilson

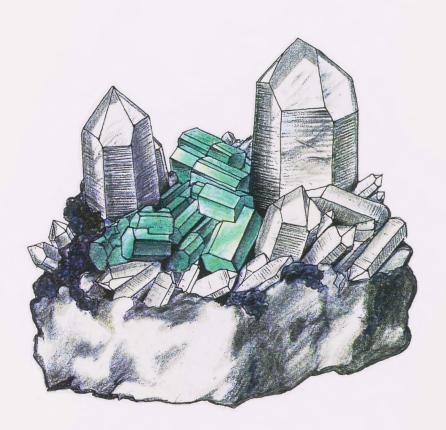

Plate I. Emerald, Colombia. (vol. 25, mo. 6, p. 59)

Redrawn after an original by S. L. Swebach Desfontaines

(ca. 1792) in the British Museum Library. Originally in

the collection of Jean Gigot d'Orcy (1733-1793).

Plate II. Apatite, Saxony. (vol. 25, no.6, p.59)

Recolored after an original in Fabien Gautier d'Agoty's Histoire Naturelle Règne Minéral (1781). Originally in the collection of Jean Gigot d'Orcy (1733-1793).

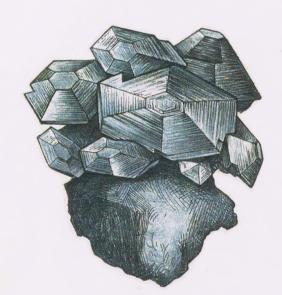

Plate III. Chalcocite, Wheal Abraham, Cornwall (vol. 25, no. 6, p. 73)
Redrawn after an original in Sowerby's British Mineralogy
(1817), figure 518. Originally in the collection of William Lowndes.

Plate II. Pyrargyrite, St. Joachimsthal, Bohemia (vol. 25, no. 6, p. 62).

Redrawn after an original in Fabien Gautier d'Agoty's

Histoire Naturelle Règne Minéral (1781), plate 28. Originally
in the collection of the Abbé Nolin.

Plate I. Silver, Kongsberg, Norway (vol. 25, no. 6, p. 62).

Drawn from a WEW photograph of the specimen taken when it was on exhibit at the Tucson Gem & Mineral Show in 1994. Collection of the Natural History Museum, Paris; originally from the collection of King Louis XV (1710-1774).

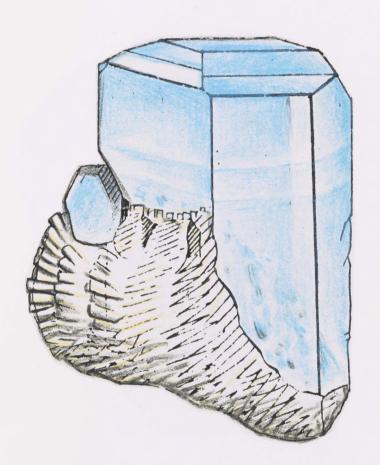

Plate II. Topaz, Odontschelon, Russia (vol. 25, no. 6, p. 80).

Line engraving from Wagner's 1818 catalog of the collection of Alexander Crichton. Handcolored by WEW based on text description of the color.

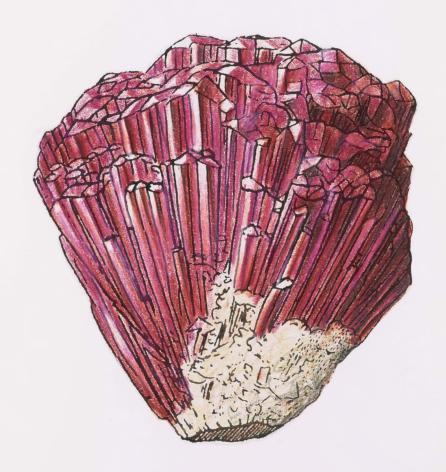

Plate VII. Elbaite ("Rubellite"), Russia (vol. 25, no. 6, p. 80)

Line engraving from Wagner's 1818 catalog of the collection of Alexander Crichton (1763-1856). Handcolored by WEW according to a photograph of the original specimen in the British Museum.

Plate VIII. Elboute, Russia (vol. 25, no. 6, p. 80).

Line engraving from Wagner's 1818 catalog of the collection of Alexander Crichton (1763-1856). Handcolored by WEW based on Wagner's text description of the color.

Plate IX. Diopside on Microcline, Russia (vol. 25, no. 6, p. 80).

Line engraving from Wagner's 1818 catalog of the collection of Alexander Crichton (1763-1856). Handcolored by WEW based on Wagner's text description of the color.

Plate I. Copper, 25 cm tall, from Siberia (vol. 25, no. 6, p. 80). Line engraving from Wagner's 1818 catalog of the collection of Alexander Crichton (1763-1856). Handcolored by WEW.

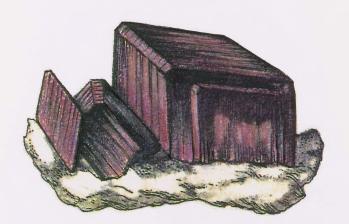

Plate II. Axinite, Balme d'Auris, Dauphiné, France (vol. 25, no. 6, p. 50). Recolored after an original in Fabien Gautier d'Agoty's Histoire Naturelle Règne Minéral (1781). Originally in the collection of Balthazar Georges Sage (1740-1824).

Plate XII. Fluorite on Mica, Zinnwald, Bohemia (vol. 25, no. 6, p. 63). Recolored after an original in Fabien Gautier d'Agoty's Histoire Naturelle Regne Minéral (1781).

Originally in the collection of Gaspard Caze de la Bove (1740-1824).

Plate XIII. Gold, probably Transylvania (vol. 25, no. 6, p. 63).
Redrawn from an original painting by J. L. Swebach
Desfontaine (ca. 1792) in the British Museum Library.
Originally in the collection of Gaspard Caze de la Bove
(1740-1824).

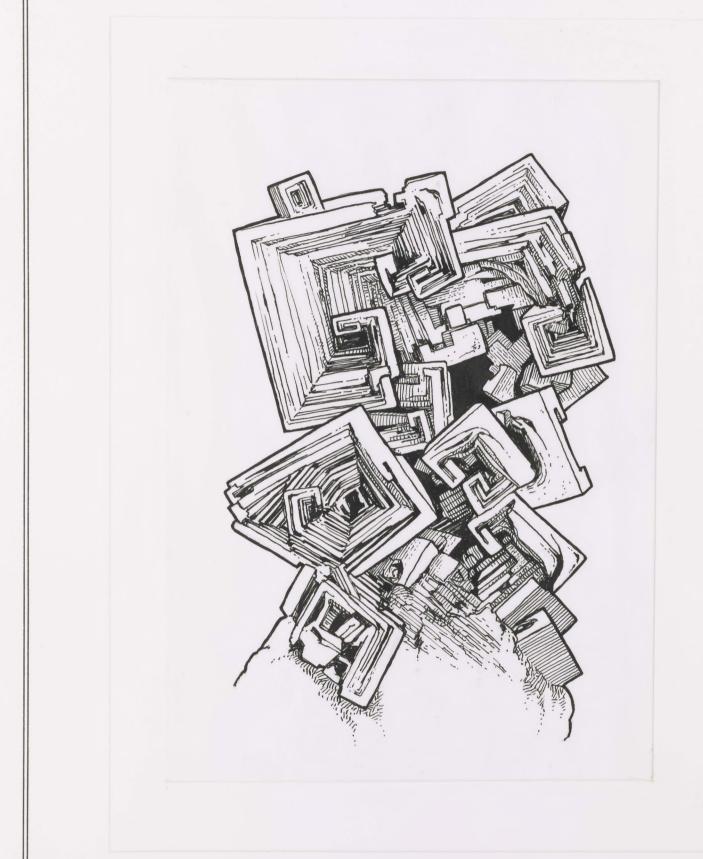

Plate XIV. Silver, 1.2 cm, Copper Falls, Michigan (vol. 17, no. 1, p. 44) Specimen originally from the Don Osson collection.

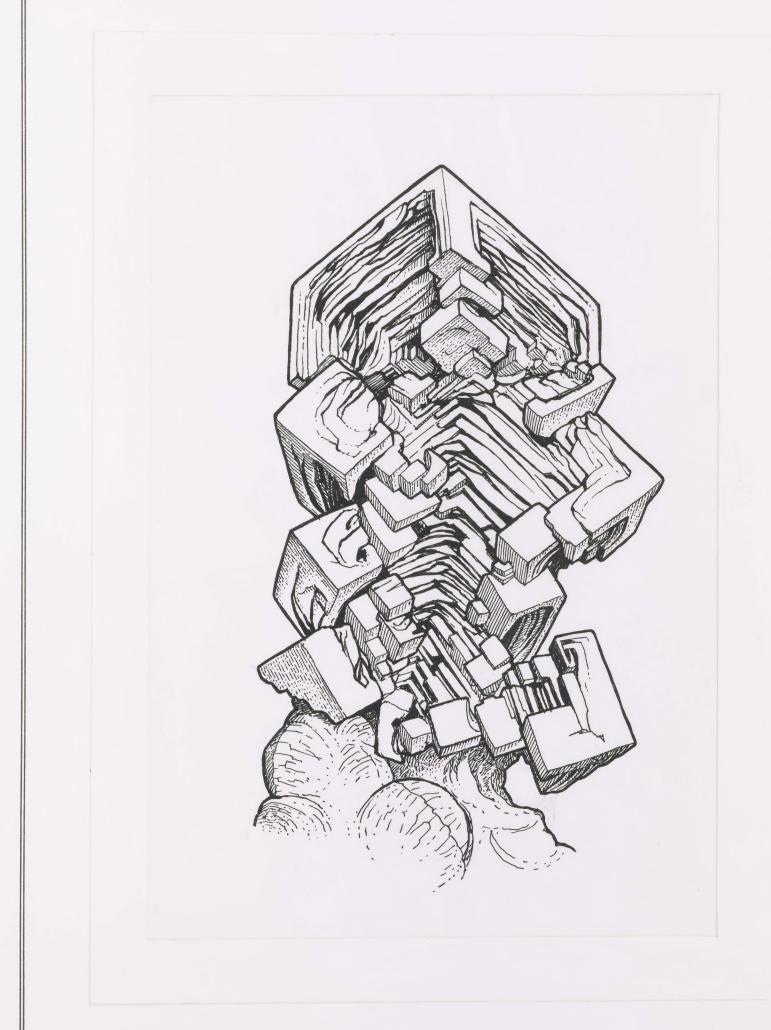

Plate XI. Silver, 1.2 cm, Copper Falls, Michigan (vol. 17/no.1, p.44). Specimen originally from the Don Olson collection.

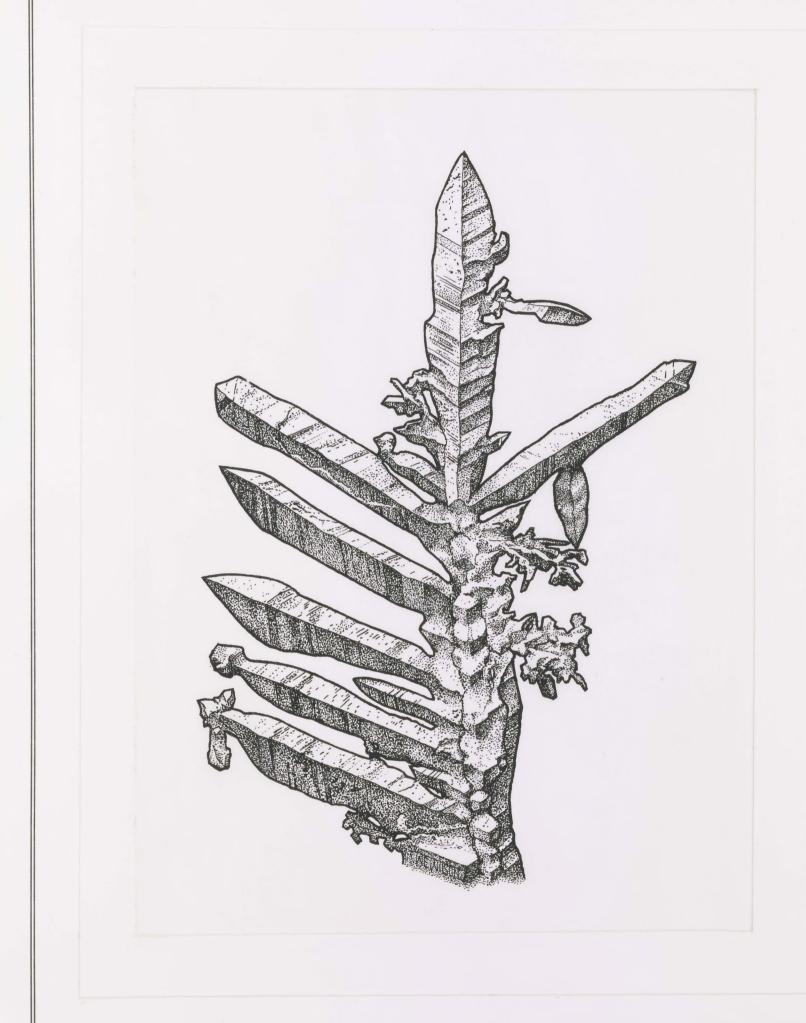

Plate XVI. Silver, 3 cm, Batopilas, Mexico (vol. 17/no. 1, p.76). Specimen originally in the Gene Schlepp collection.

1987,WEW

Plate XVII. Cobaltian Adamite, 3.2 cm, Ojuela mine, Mapimi, Mexico (vol. 18, no.5, p. 349). Drawn from the photo on the cover of vol. 13, no.3, for the 1987 Pasadena Satellite Show ad. The specimen is currently in the collection of Ralph Clark.

Plate XVIII. The Matto Grosso Diamond, 227 carats (vol. 20, no. 5, p. 334). Drawn from an old photo.

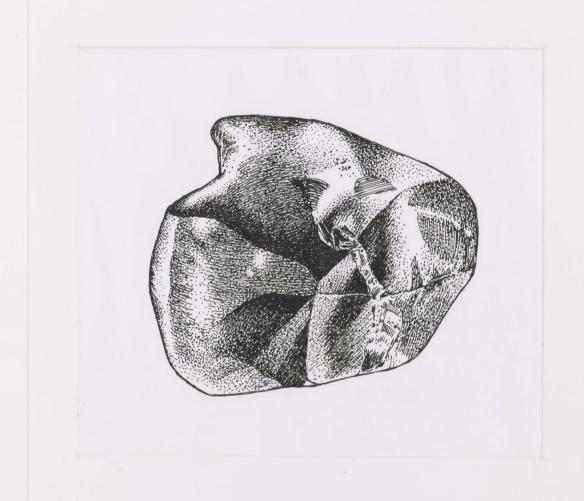

Plate XIX. The Independência Diamond, 106 carats, from the Tijuco River, Minas Gerais, Brazil (Vol. 20, no. 5, p. 331). Drawn from an old photo.

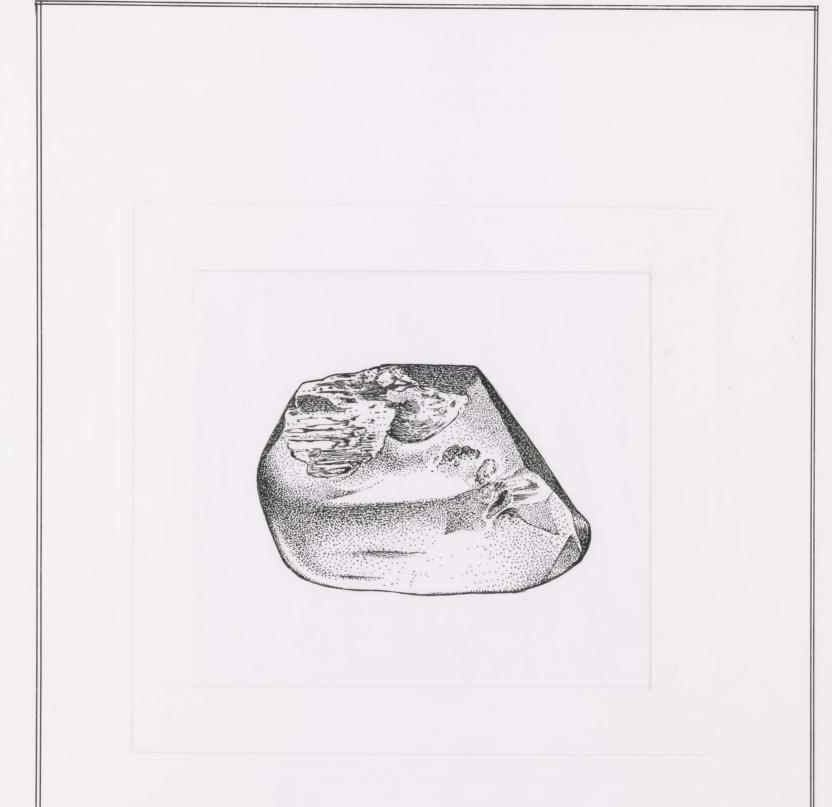

Plate XX. The Presidente Dutra Diamond, 409 carats, from Dourado River, Minas Gerais, Brazil (Vol. 20, no.5, p.333). Drawn from an old photo.

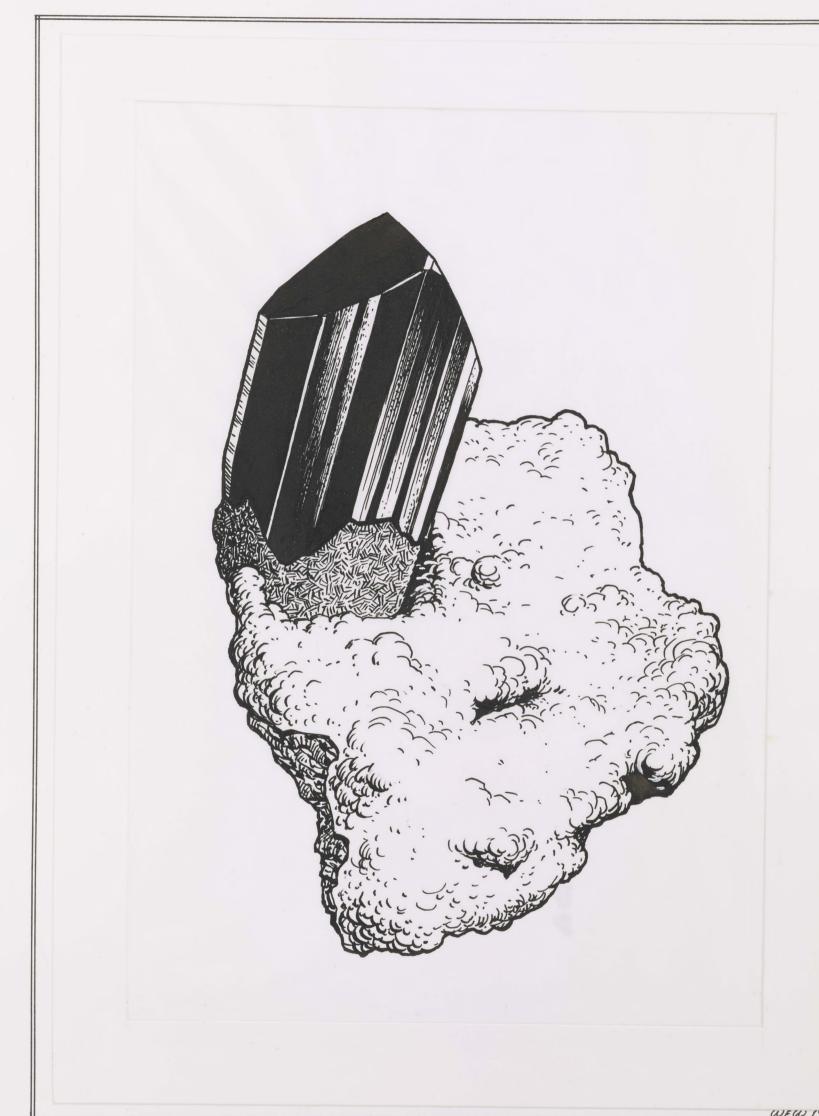

Plate XXI. Azurite and Malachite, Tsumeb. Drawn for the Tucson Gem and Mineral Show ad, but ultimately used in the show's catalog only, and not in the magazine.

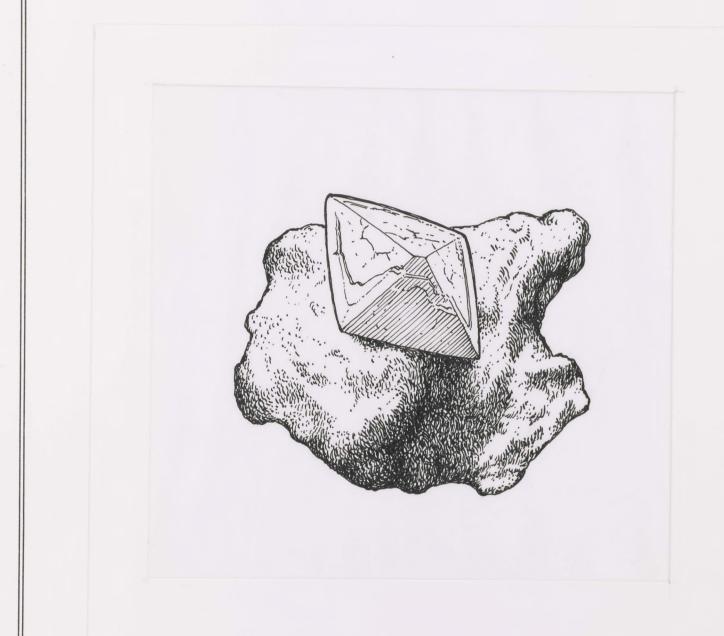

Plate XXII. Scheelite, Traversella, Italy (vol. 19, no. 3, p. 195).

Drawn from a photo of a specimen in the Sergio Gallo collectin shown in vol. 4, no. 1, p. 40, for use in the Torino Show ad.

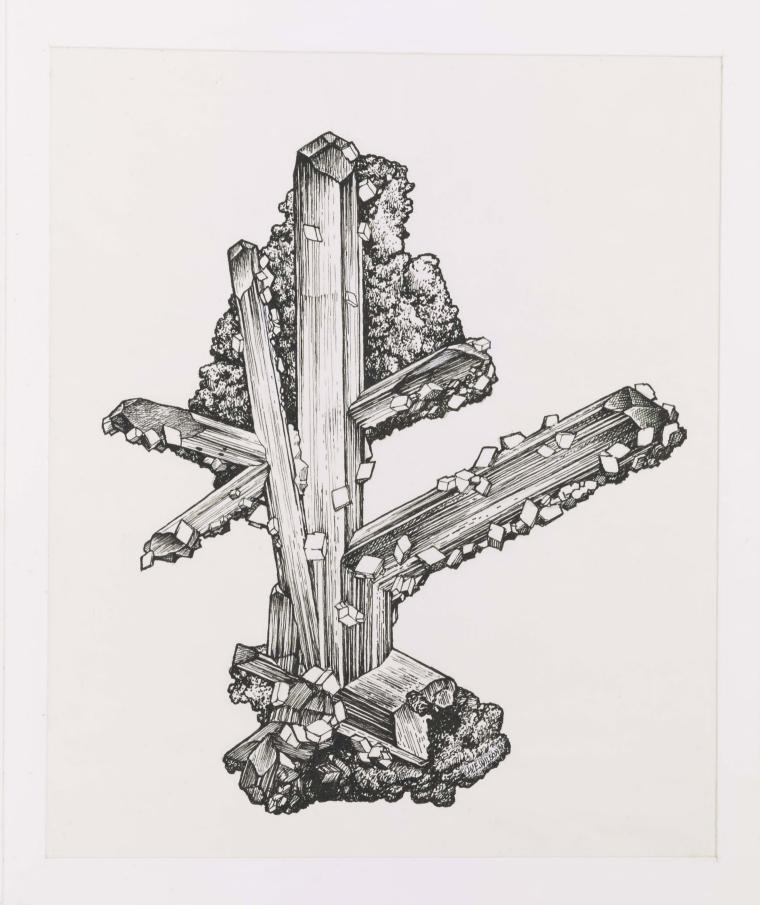

Plate XXIII. Cerussite with Dolomite, Tsumeb (vol. 8, no. 3, p. 117).

Drawn from a photo for Miriam and Julius Zweibel's ad in the Tsumeb Issue.

Plate XXIV. Morganite on Elbaite from the Tourmaline Queen mine (vol. 8, no. 4, inside back cover). Drawn from a photo for Keith Proctor's ad and Business Cords.

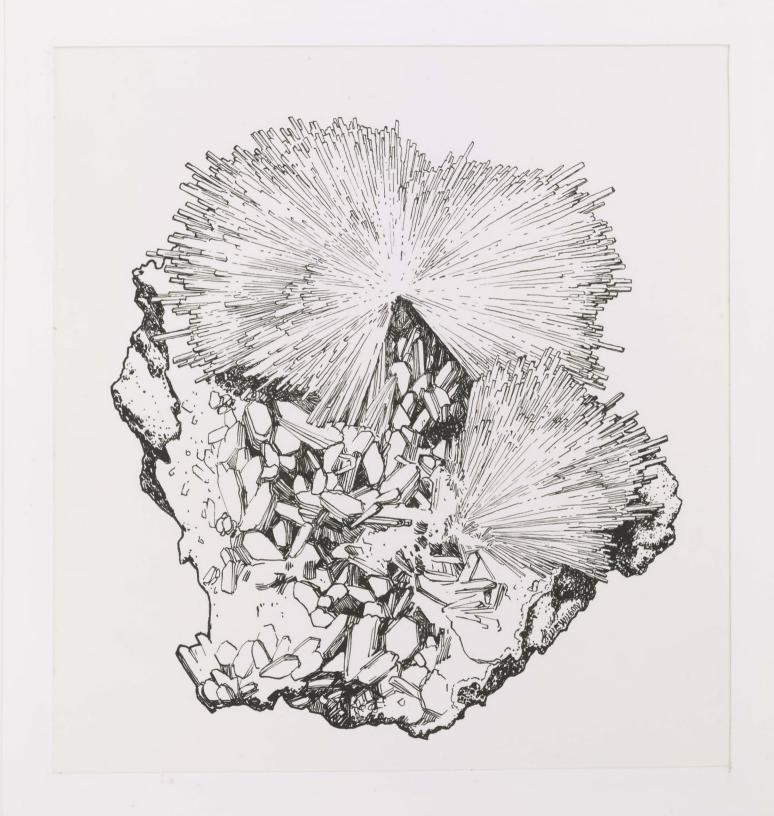

Plate XXV. Scolecite with Heulandite, India (vol. 12, no. 5, p. 324). Drawn from a photo for Miriam and Julius Zweibel's ad.

Plate XXVI. Gold, California (Vol. 8, no. 6, p. 526). Drawn from the actual specimen for Rich Kosnar's ad.

Plate XXVII. Sphalerite on Fluorite, Elmwood, Tennessee, about 17 cm.

Drawn from the actual specimen for Larry Conklin's ad but ultimately used only on his stationery.

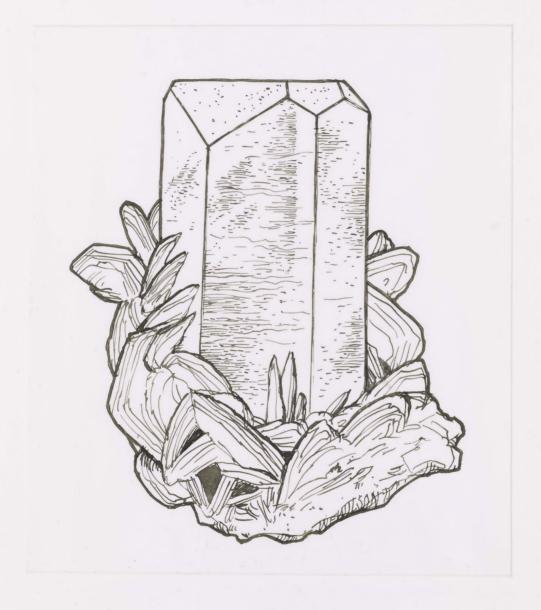

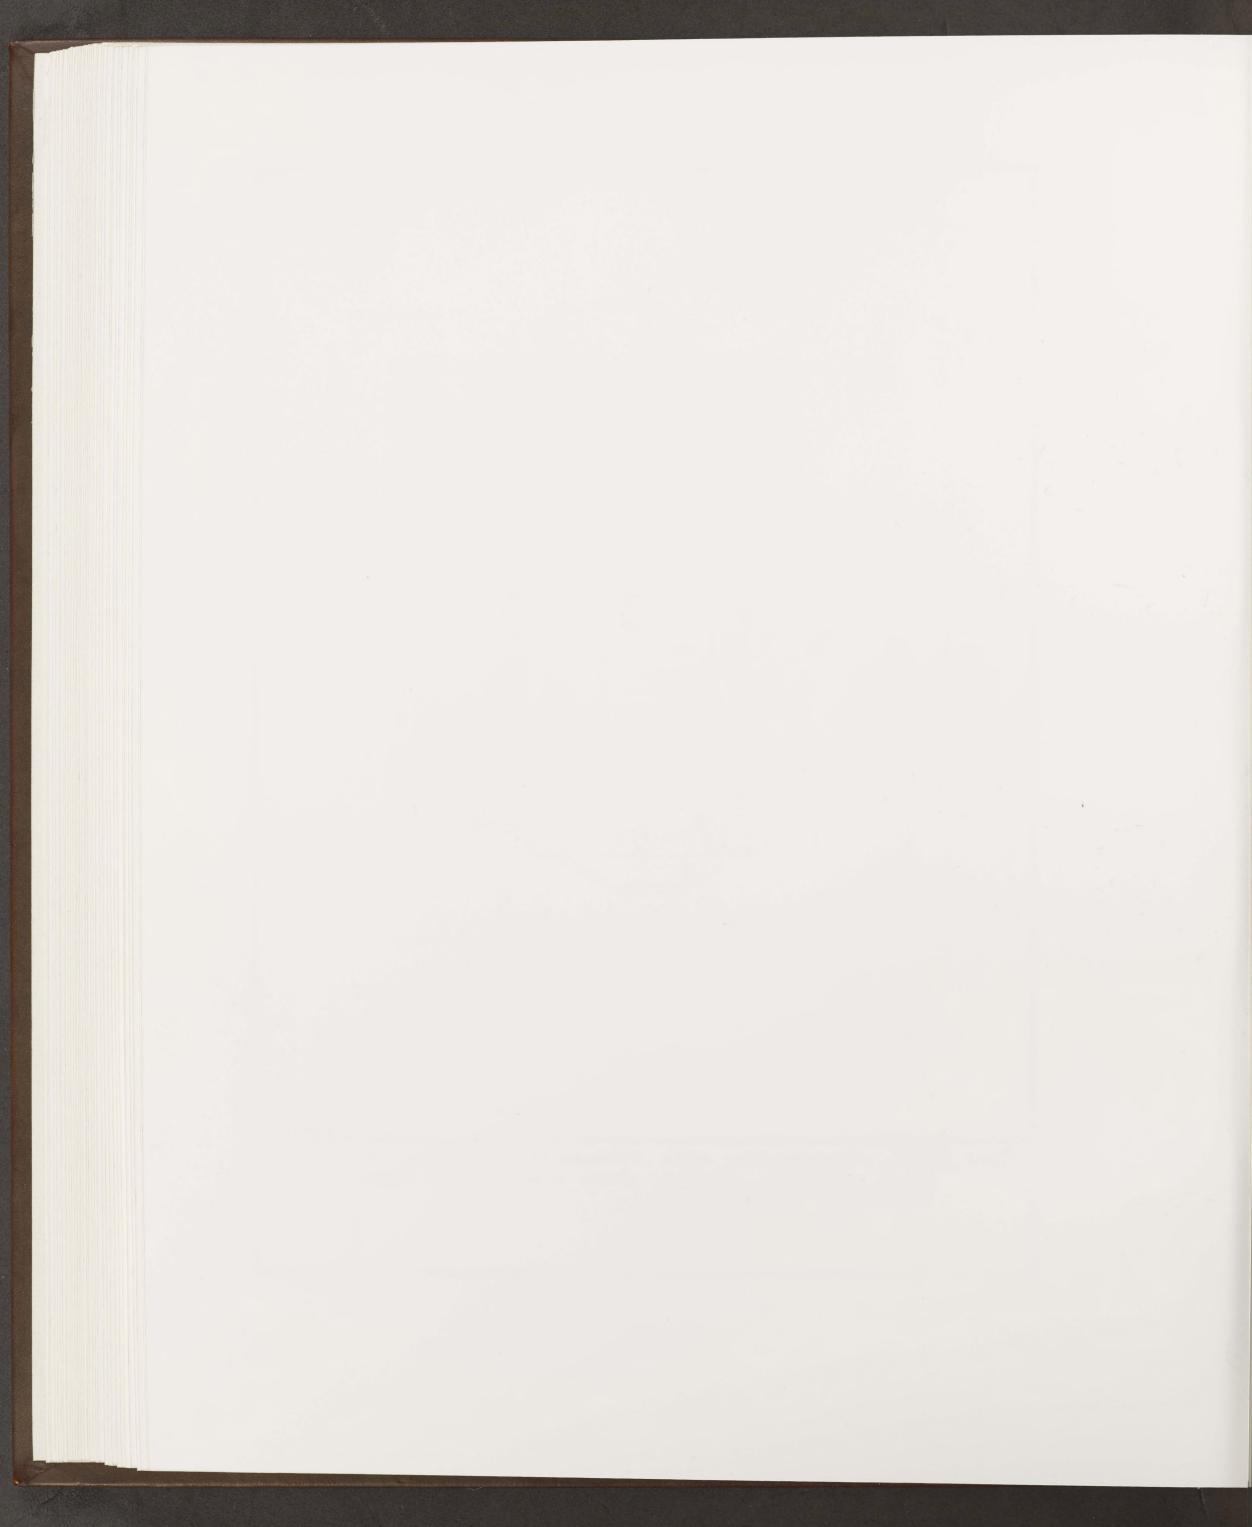

Plate XXVIII. Aquamarine with Muscovite, Pakistan (vol. 20, no.6, p. 503). Drawn from a photo for François Lietard's ad.

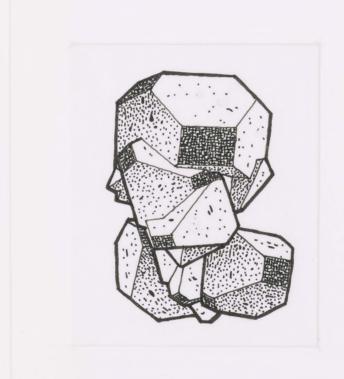

Plate XXIX. Cafarsite. Drawn for an advertiser but never used.

Plate XXX. Proustite, Freiberg, Saxony, 3.6 cm. Specimen in the collection of Martin Zinn. Drawn to be given away as framing prints to advertisers at Christmas; based on the cover photo in vol. 20, no. 3. Also used in Zinn show ad in vol. 21, no. 4, p. 378.

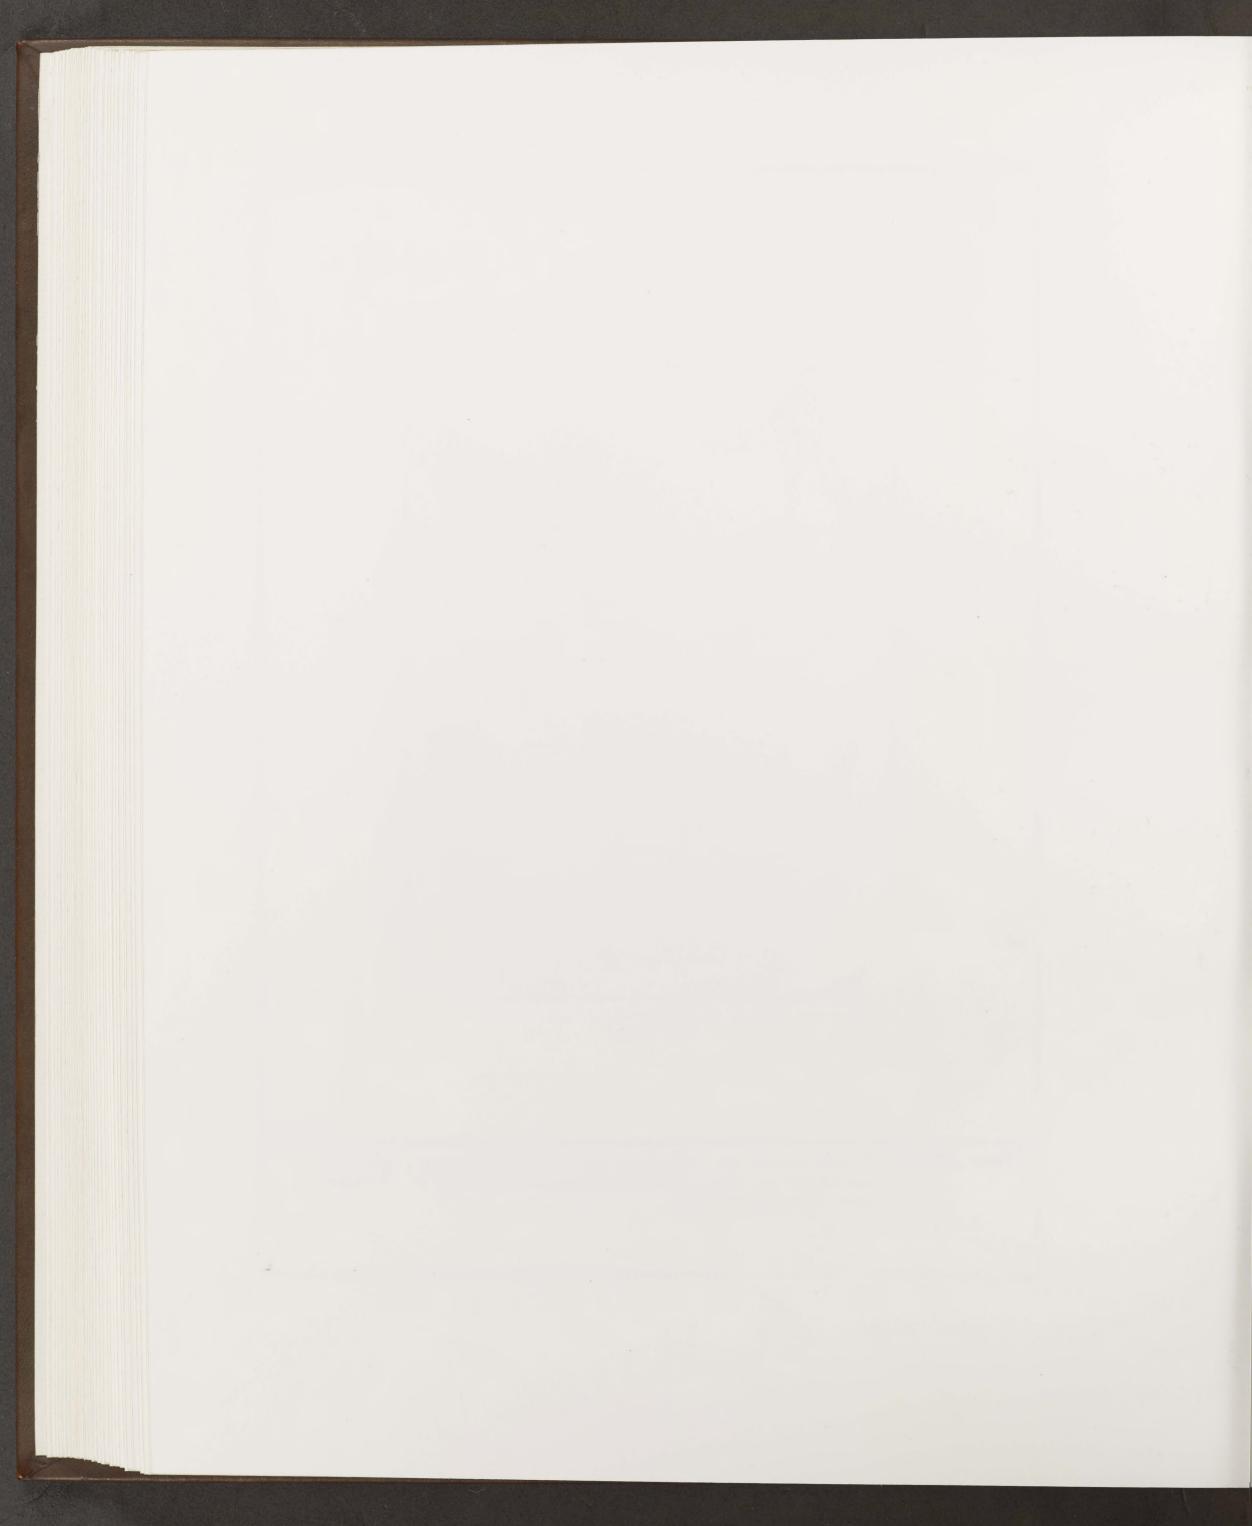

WESU 1987

Plate XXXI. Wulfenite, Red Cloud mine (an imaginary specimen based loosely on several photos.) Drawn for the U.S. Postal Service, as a cancellation to be used at the Tucson Show.

Plate XXXII. Roadrunner on Malachite crystal group, Bisbee.
Published in the Mineralogical Record's Tucson
Show Quide 1988.

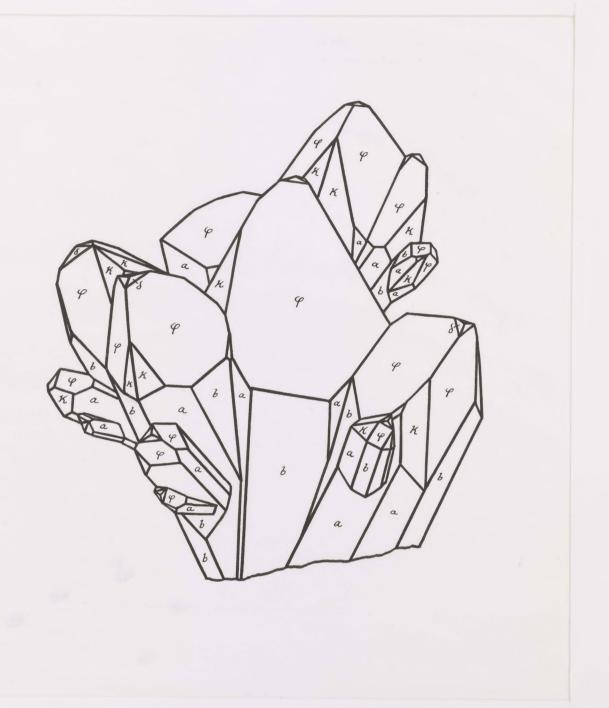

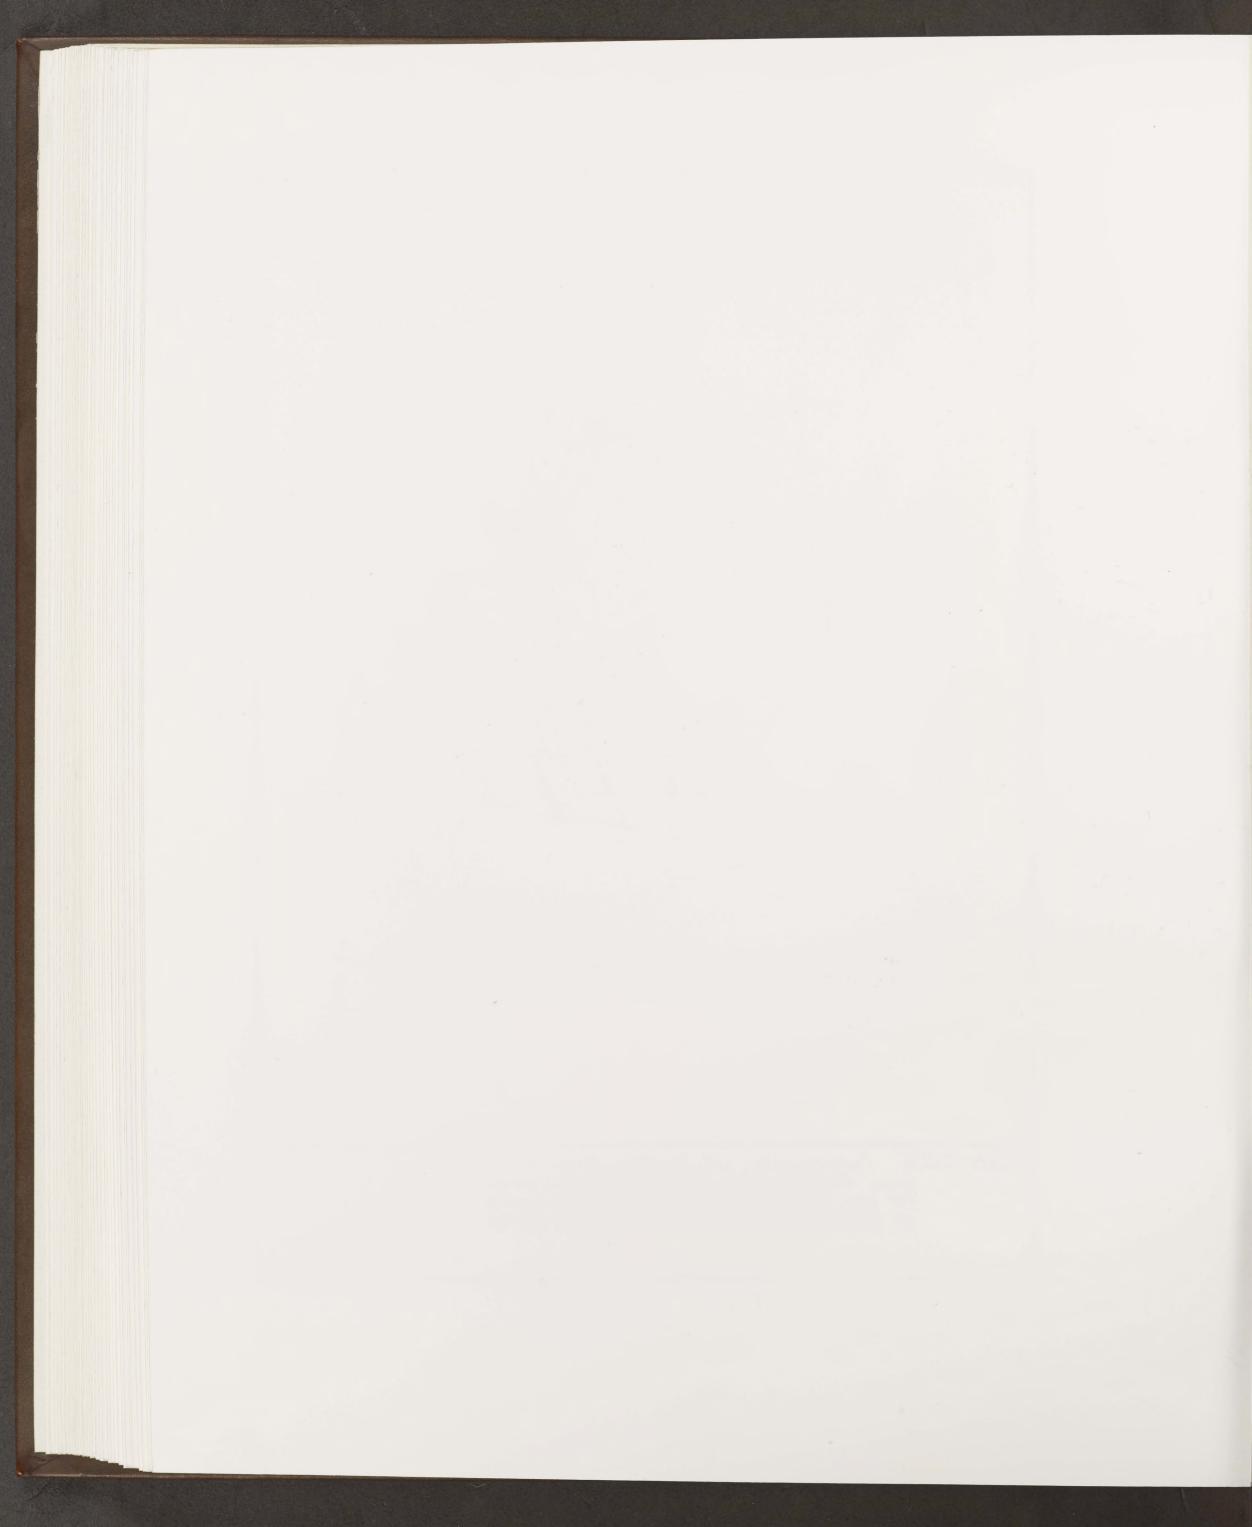

Plate XXXIII. Pyrargyrite, St. Andreasberg; redrawn from Goldschmitt's Atlas der Krystallformen for use on the cover of the fourth edition of the Glossaly of Mineral Species (1983).

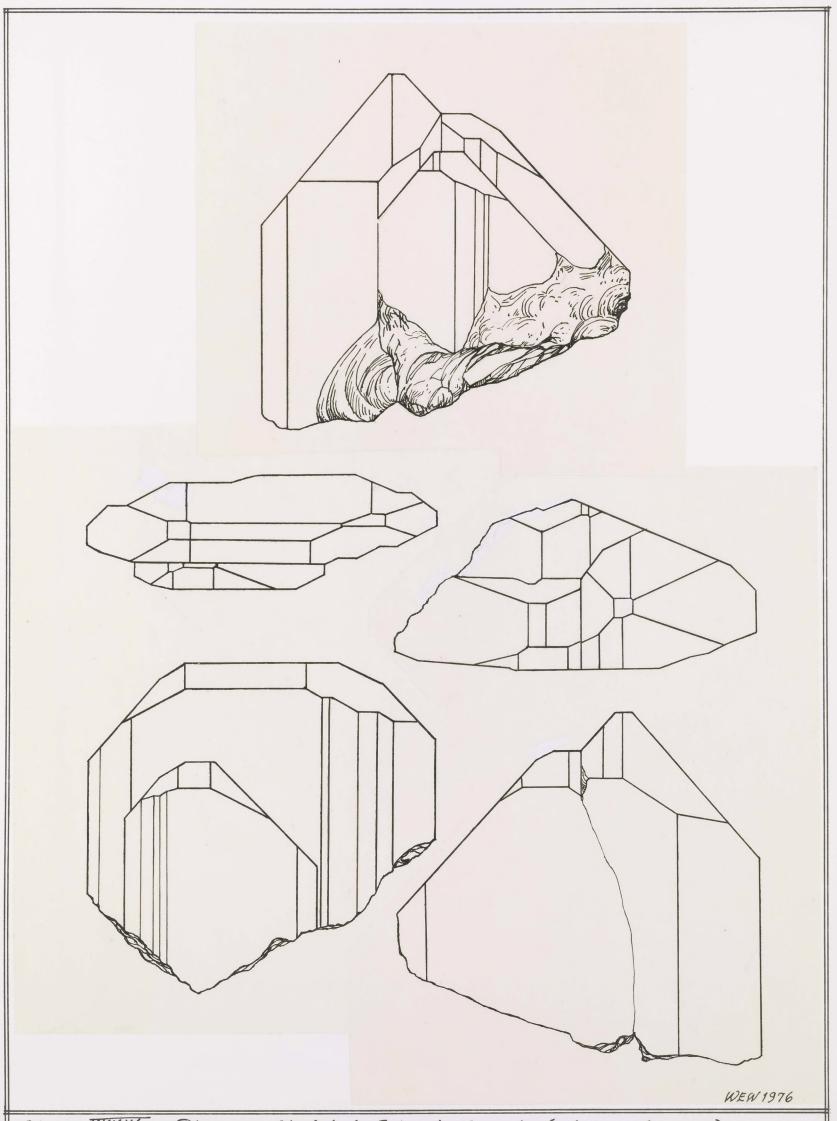

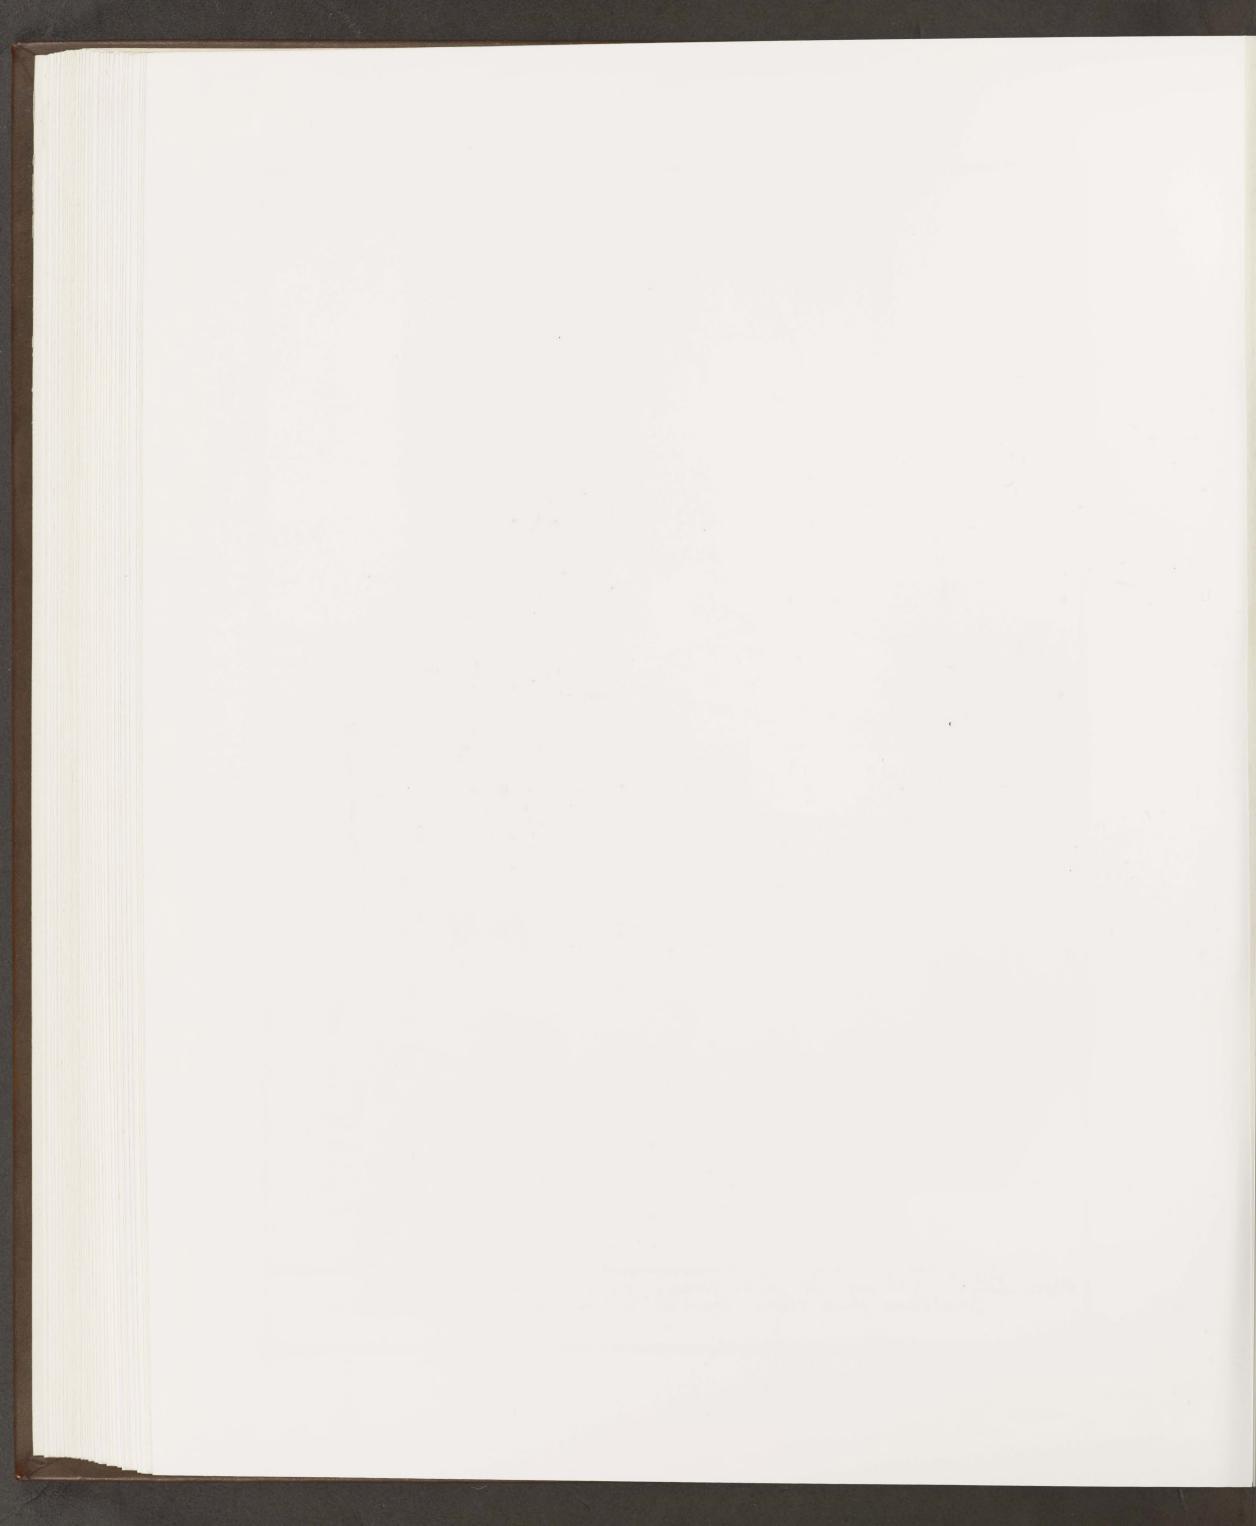

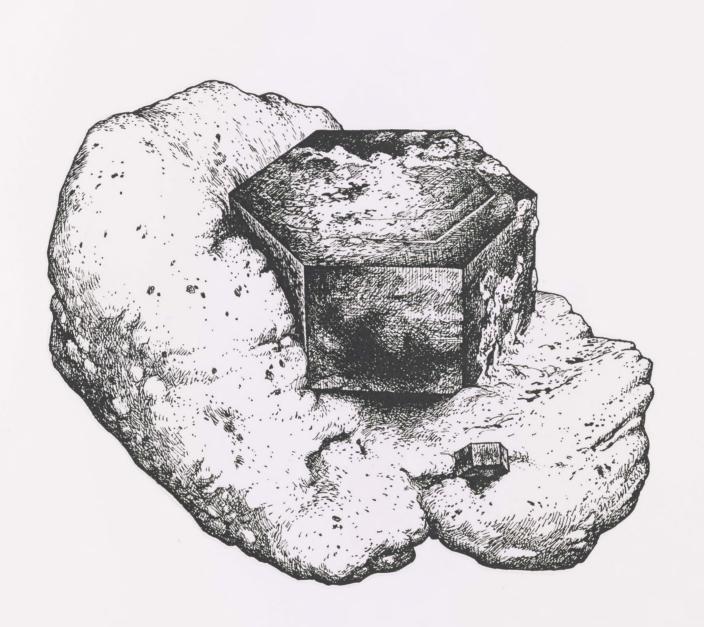

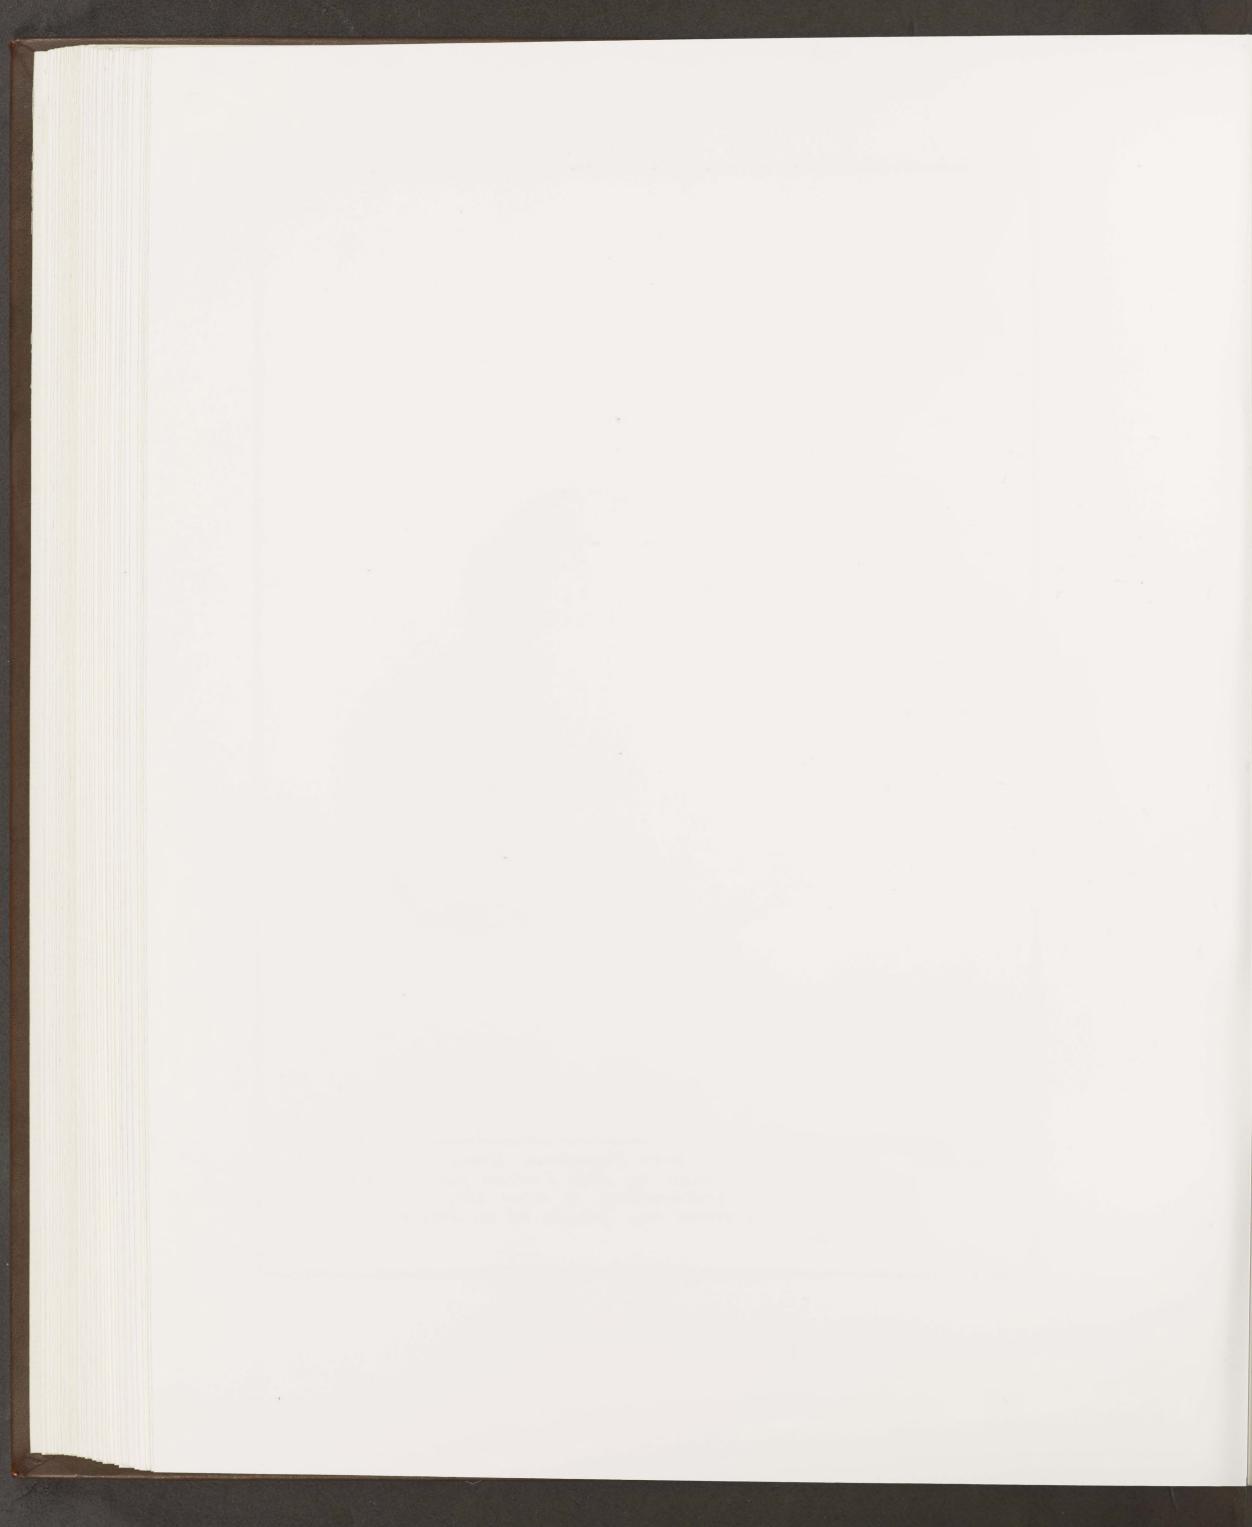

Plate XXXIV. Olivine, St. John's Island, Egypt, (vol. 7, no. 6, p. 311).
Sketched from three crystals in the Smithsonian Collection.

WFW) 1976

Plate XXXV. Red Beryl, Wah Wah Mountains, Utah (Vol. 7, no. 4, p. 183). Commissioned by Bill Larson for his ad, in which he was announcing a new strike of red beryl. Drawn from my photo of a Smithsonian specimen.

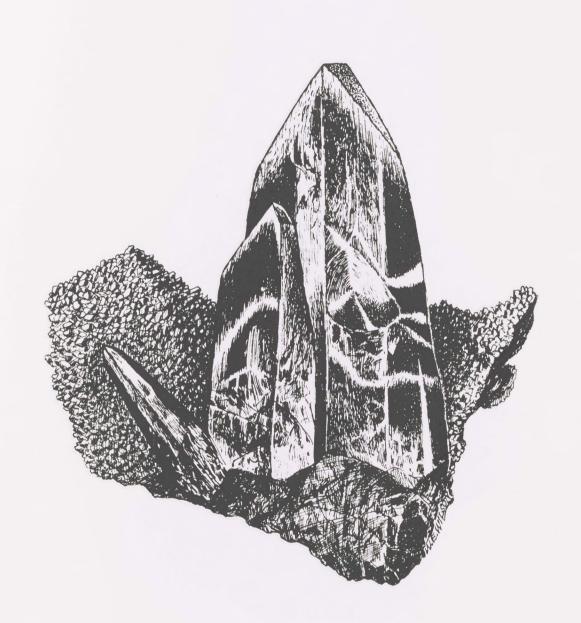

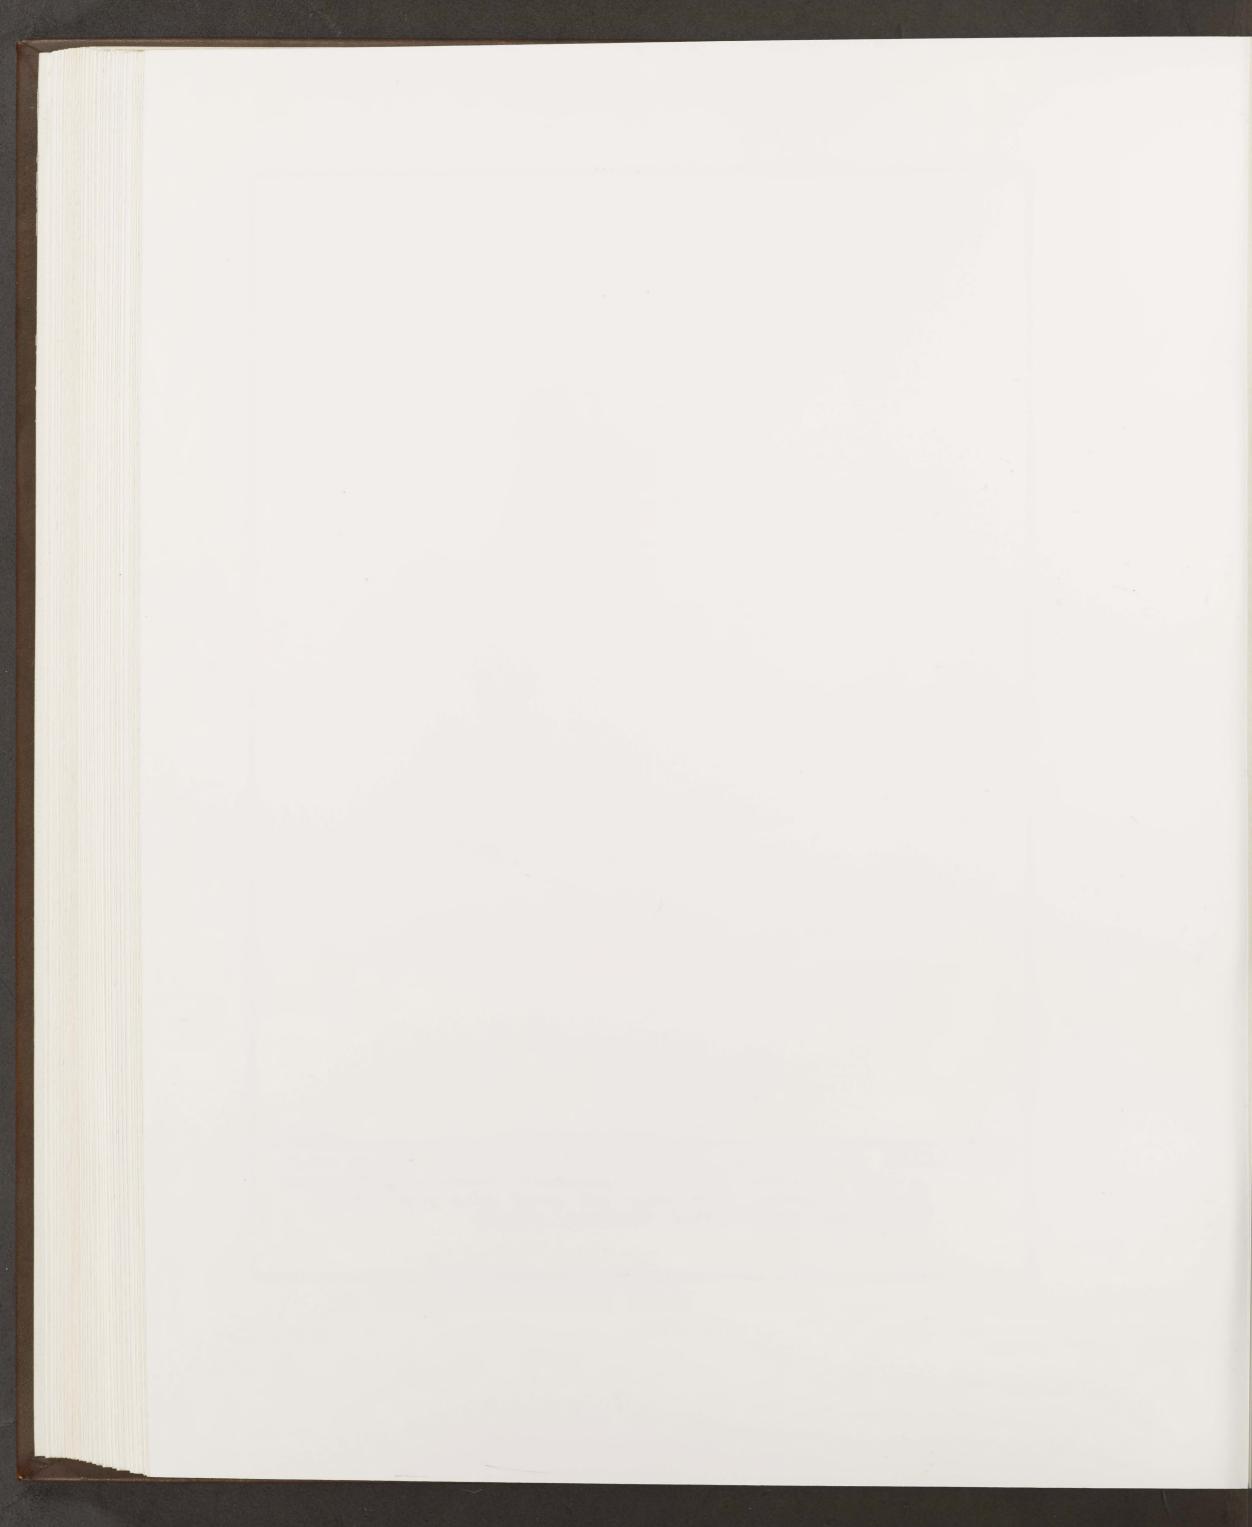

Plate XXXVI. Barite, Elk Creek, South Dakota (vol.3, no.4, p. 149).

Drawn roughly from a specimen I once owned,
at the request of Gary Hansen, who had recently
collected such specimen. It was my first mineral
art commission.

Plate XXXVII. Pyromorphite, 3 cm, Les Farges, France (vol. 9, no. 5, p. 319). Drawn from a specimen owned by Ken and Betty Roberts, for their ad and also for their specimen labels and business cards.

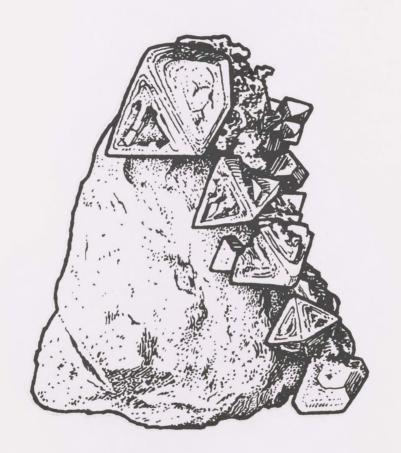

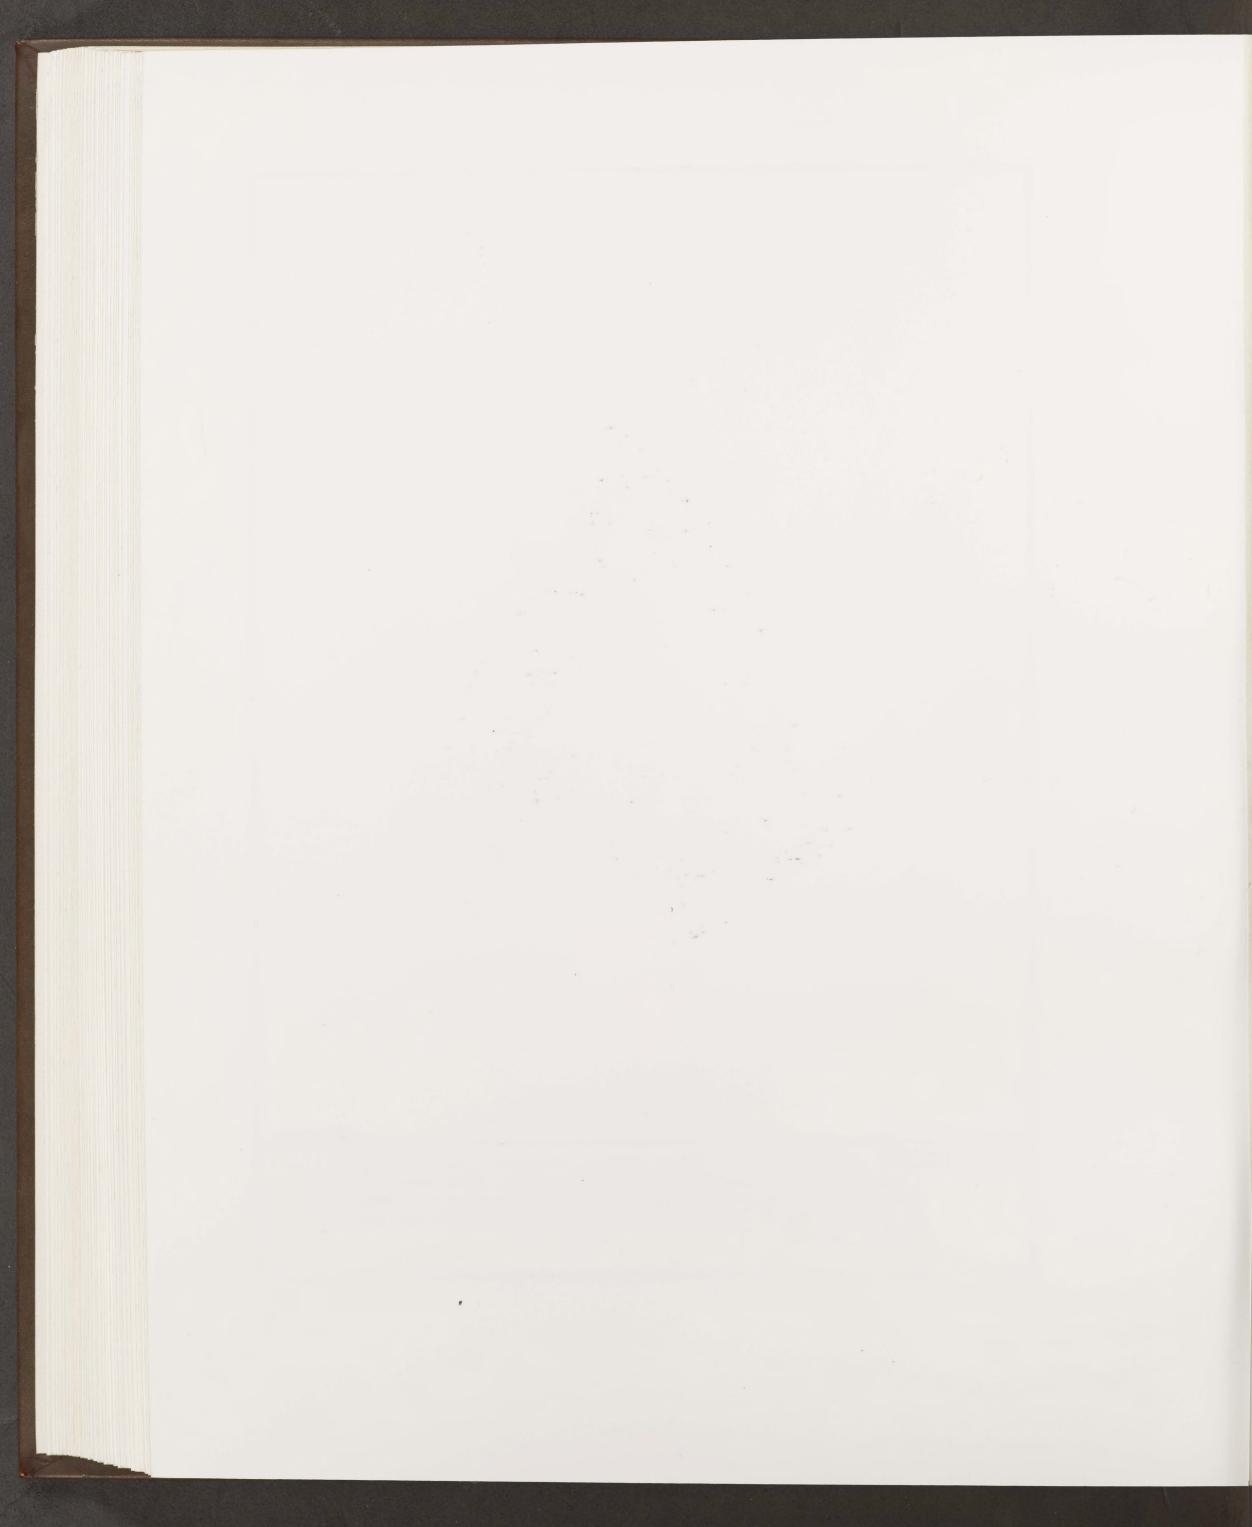

Plate XXXVIII. Gold, 2.5 cm, from the Colorado Quartz mine, California. Commissioned by John Barlow for use in his ad (vol. 15, no. 3, inside back cover), based on a photo of a specimen in his collection in Vol. 13, no. 6, p. 366.

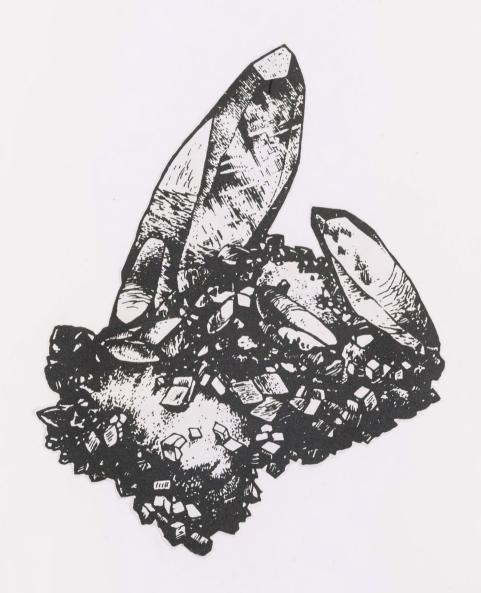

Plate XXXIX. (alcite, Sweetwater, Missouri. Drawn for Victor Yount's ad (vol. 12, no. 1, p. 27), after a photo of mine (cover, vol. 8, no. 1) showing a specimen from my collection.

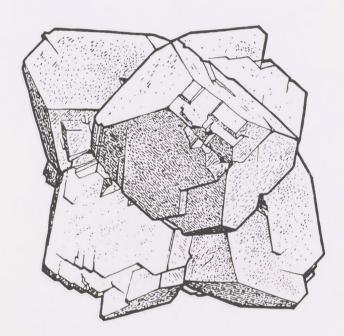

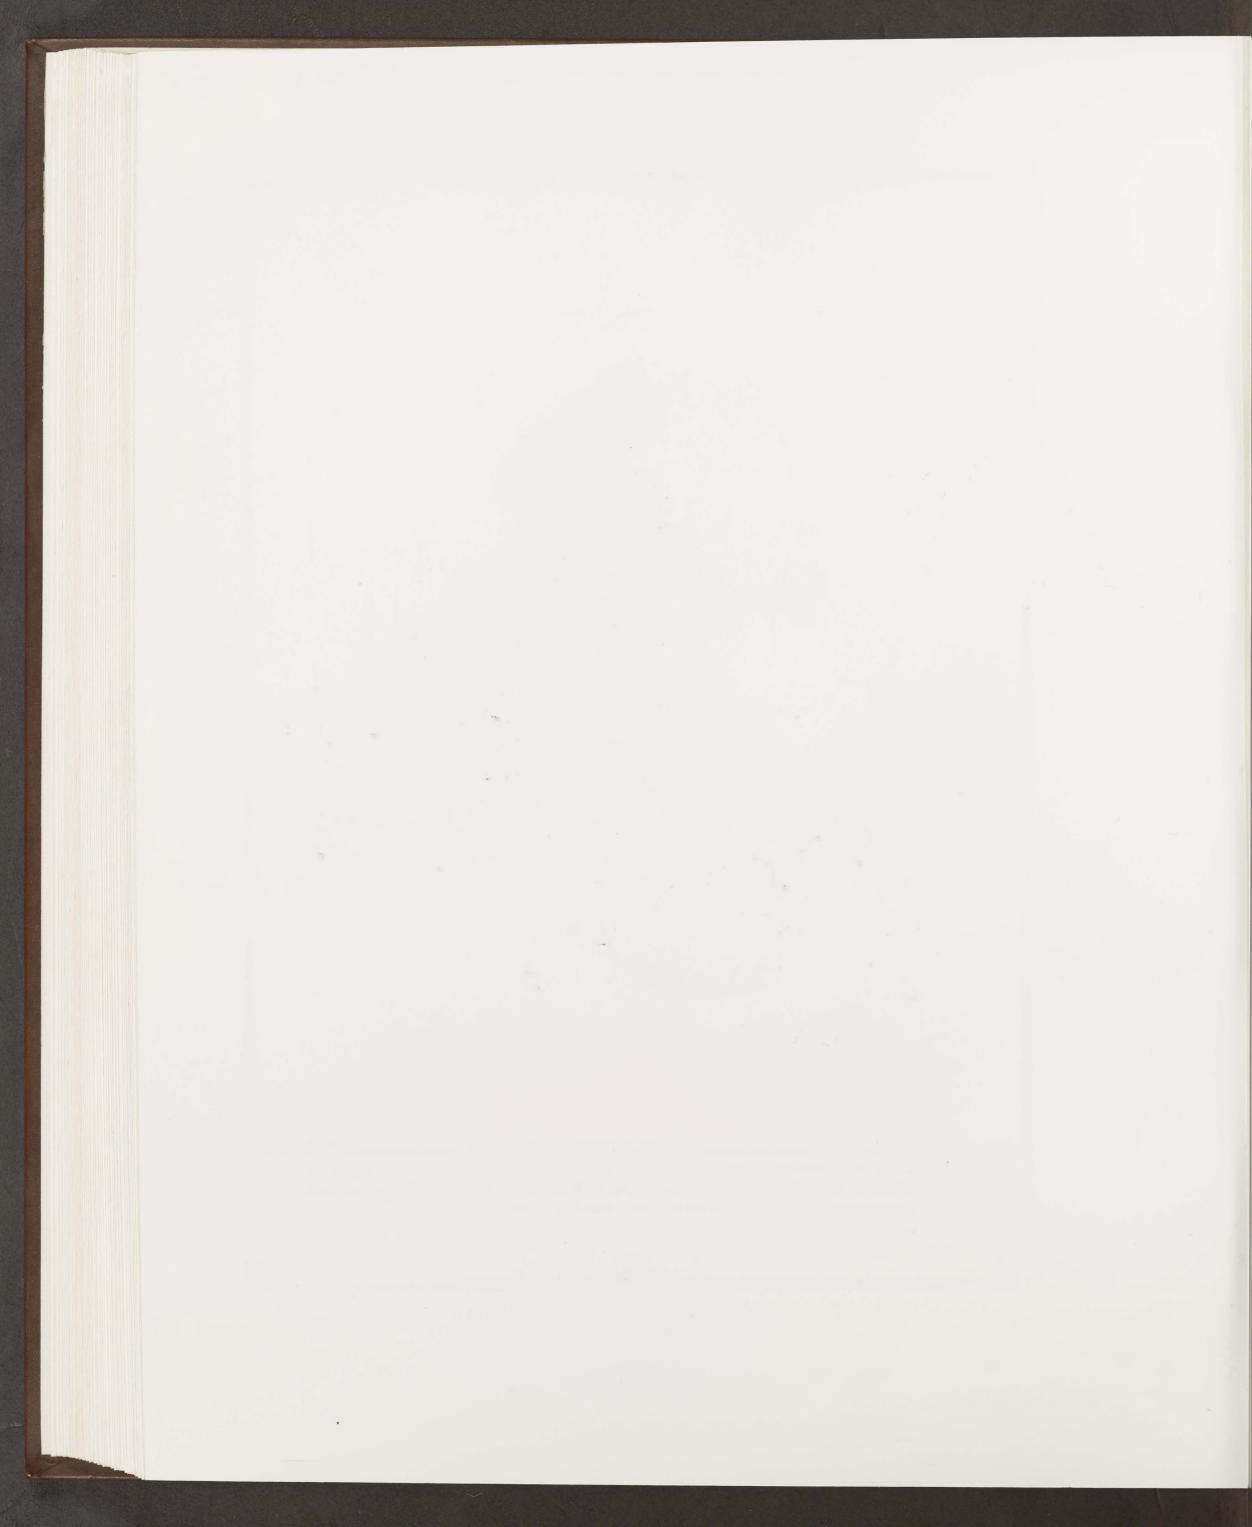

Plate XL. The great Cumengite in the Sorbonne Collection, from Boléo, Baja California, Mexico. Drawn from a photograph for use in vol. 29, no. 1, the Boléo Issue.

Plate XLI. Gold, Nevada County, California (vol. 9, no. 6, inside front cover). Drawn for Wayne and Dona Leicht's ad, after a photo in vol. 9, no. 1.

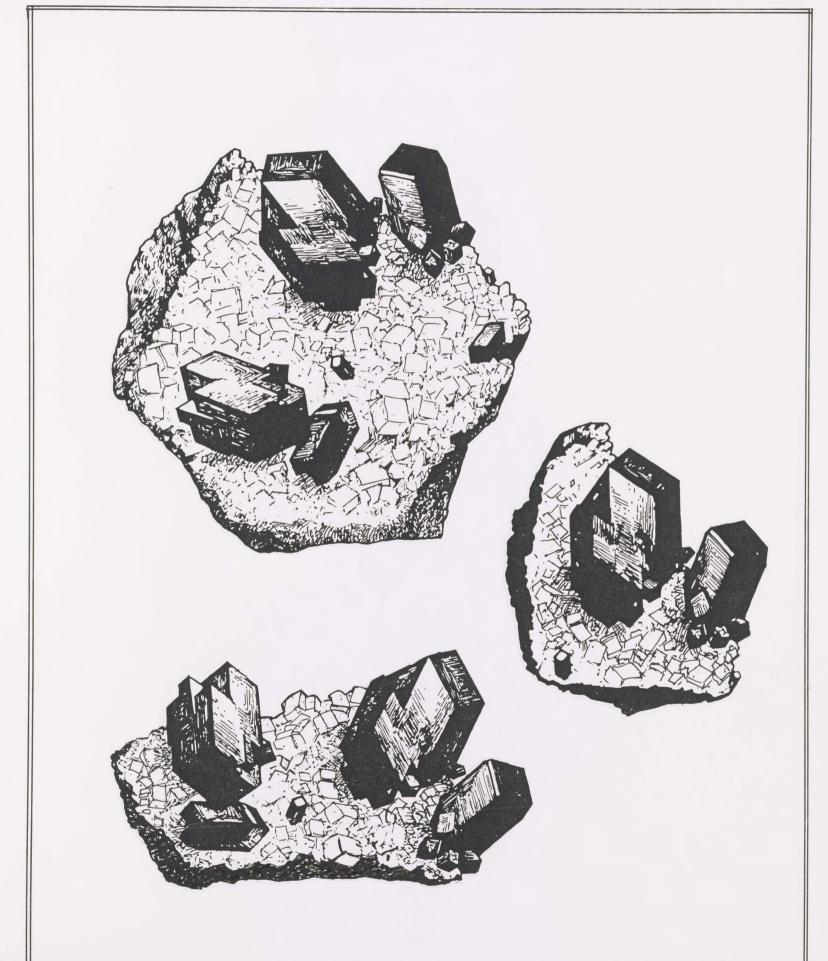

Plate XLII. Dioptase, Tsumeb. Commissioned by Stan Lesnick for his ad. The top drawing was used first (in vol. 10, no. 4, p. 253), but was cut down to the right drawing to make more space for text in vol. 13, no. 6. The bottom version was cut to fit a horizontal space in vol. 15, no. 4, p. 216. Drawn from a Lesnick specimen.

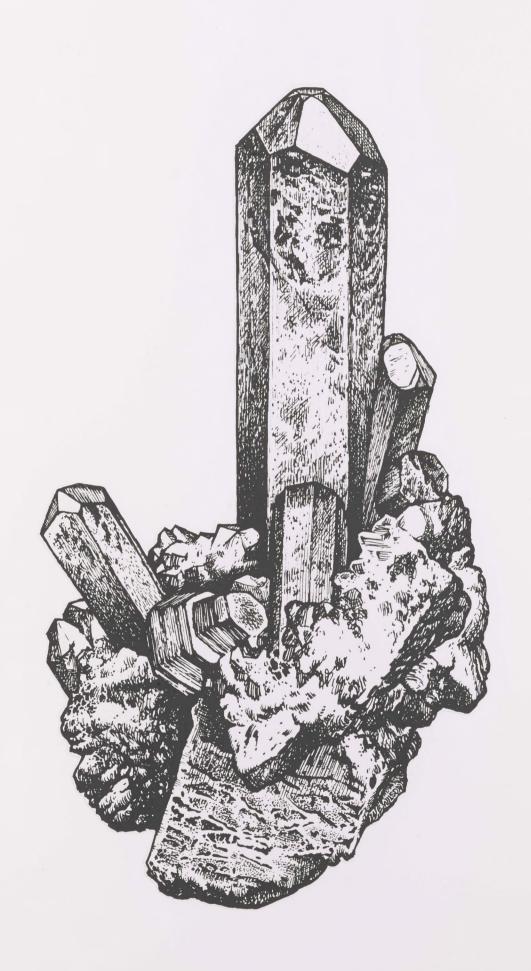

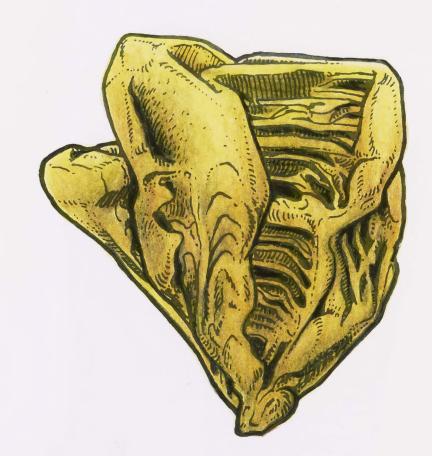

Plate XLIII. Aquamarine with lepidolite and feldspar, Espirito Santo, Brazil. Drawn from a photo of the specimen for Jack Lowell's ad (vol. 6, no. 2, p. 62).

Plate XLIV. Aquamarine, Espirito Santo, Brazil. Handcolored version of previous plate (never published).

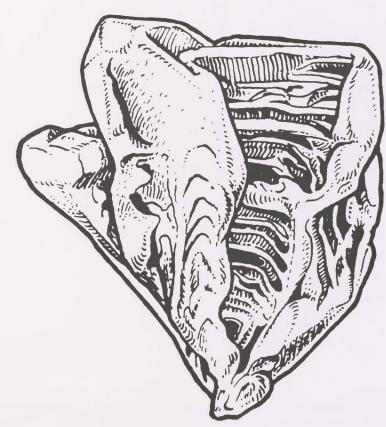

Plate XLV. Gold, Santa Elena, Venezuela. (vol. 13, no.6, p. 365). Drawn from a photo for use in the article on John Barlow's gold collection. Handcolored version never used.

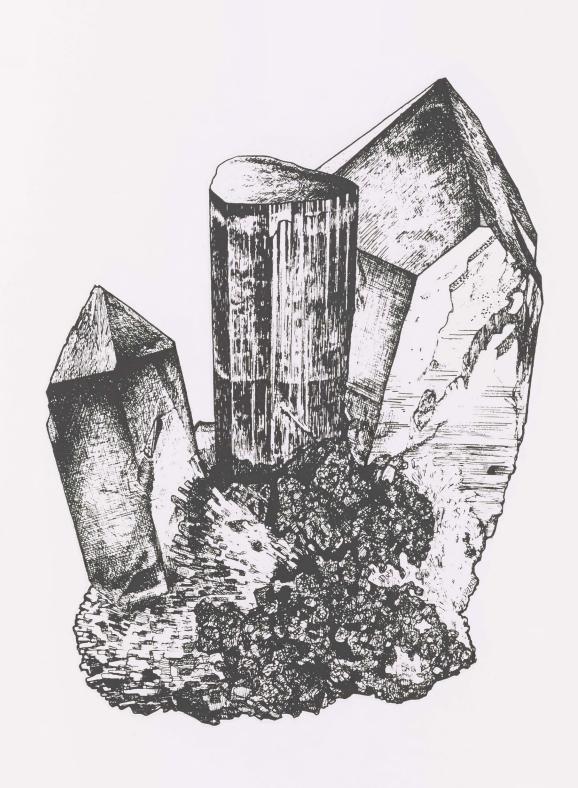

Plate XLVI. Elbaite with Quartz and Lepidolite, Tourmaline Queen mine, California (vol. 10, no. 5, back cover). This is the famous "Postage Stamp Tourmaline," sold to Dave Wilber by the Smithsonian before they realized it had been chosen by the postal service to depict on a stamp. Drawing commissioned by Dave for his ad.

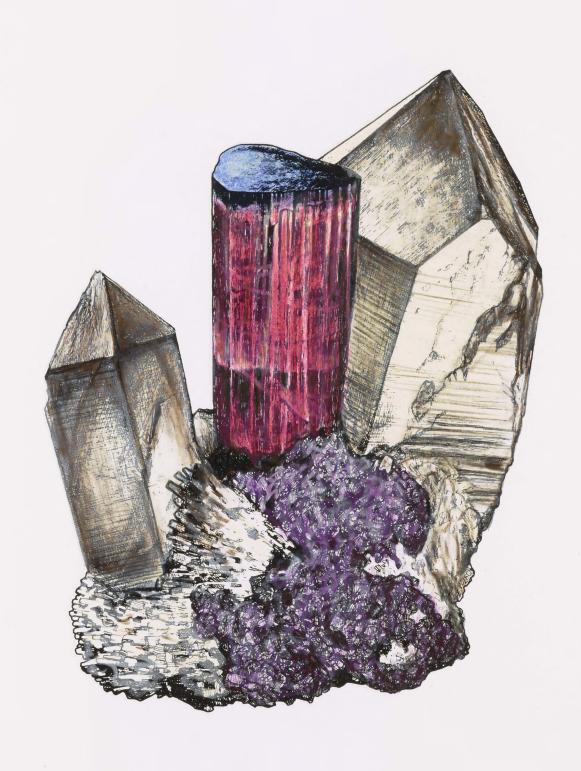

Plate XLVII. Elbaite with Quartz and Lepidolite, Tourmaline Queen mine, California. Some years after the pen-and-ink version was done (see previous plate), Dave commissioned me to handcolor the original, which I did, along with this copy (never published). I think he sold the specimen and drawing later to John Barlow.

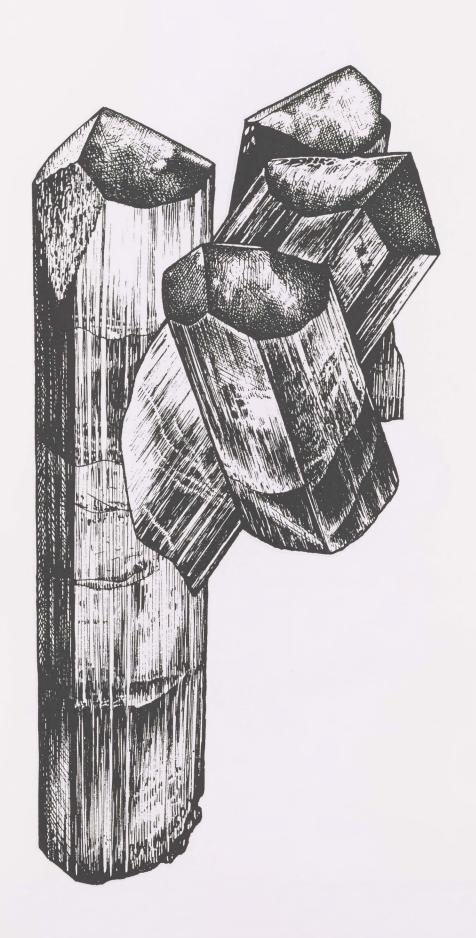

Plate XLVIII. Elbaite, Himalaya mine, California (vol. 8, no. 4, p. 285).

Commissioned by Bill Larson for his ad; drawn from a photo by Hourold and Erica Van Pelt (see adv., vol. 7, no. 6.).

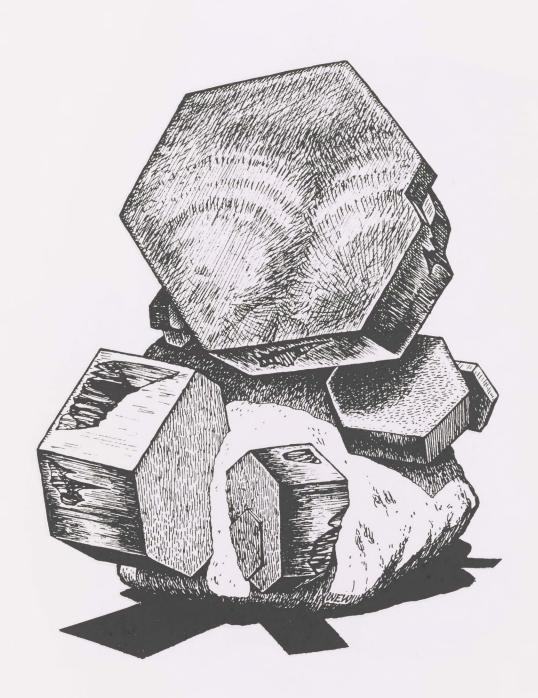

Plate XLIX. Vanadinite, Mibladen, Morocco (vol. 7, no. 6, p. 268).

An invented specimen, based on a cabinet specimen in my collection. Commissioned by Victor Yount following my published interview with him which helped to launch his new mineral business (vol. 7, no. 5). He used the drawing in his ad for many years.

WEW 1973

Plate L. "Blue-cap" Elbaite with Quartz and Lepidolite, Tourmaline Queen mine, California. Commissioned by Bill Larson for his ad (vol. 4, no. 1, p. 83).

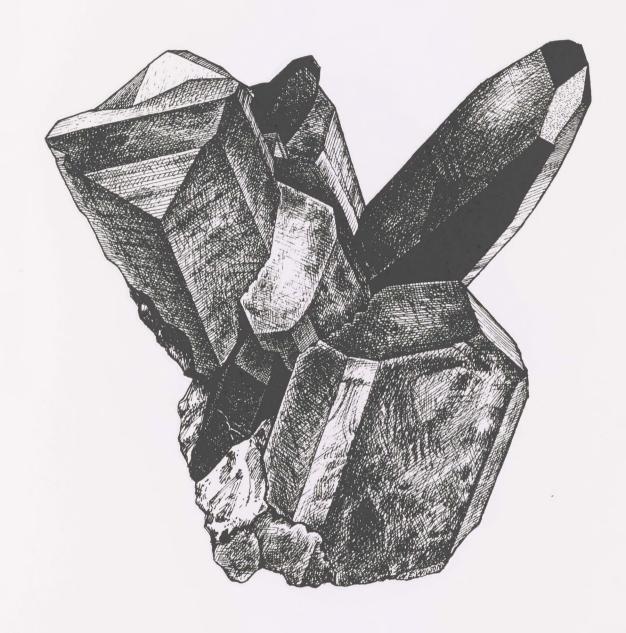

Plate L1. Amazonite and Smoky Quartz, Lake George, Colorado. Commissioned by Rich Kosnar for his ad in the first Colorado Issue (vol. 7, no. 6, p. 324); drawn from a photo of one of his specimens.

Plate LII. Gold, Colorado Quartz mine, California. Drawn for Bill Larson's ad but never used. See vol. 13, no. 6, back cover, for a photo of the actual specimen.

Plate LIII. Gold, California (vol. 5, no. 6, inside front cover). Commissioned by Dave Wilber for his ad.

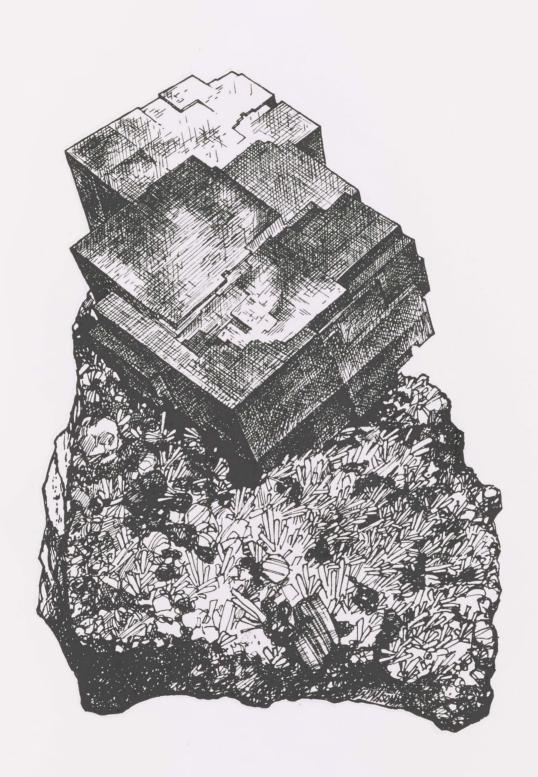

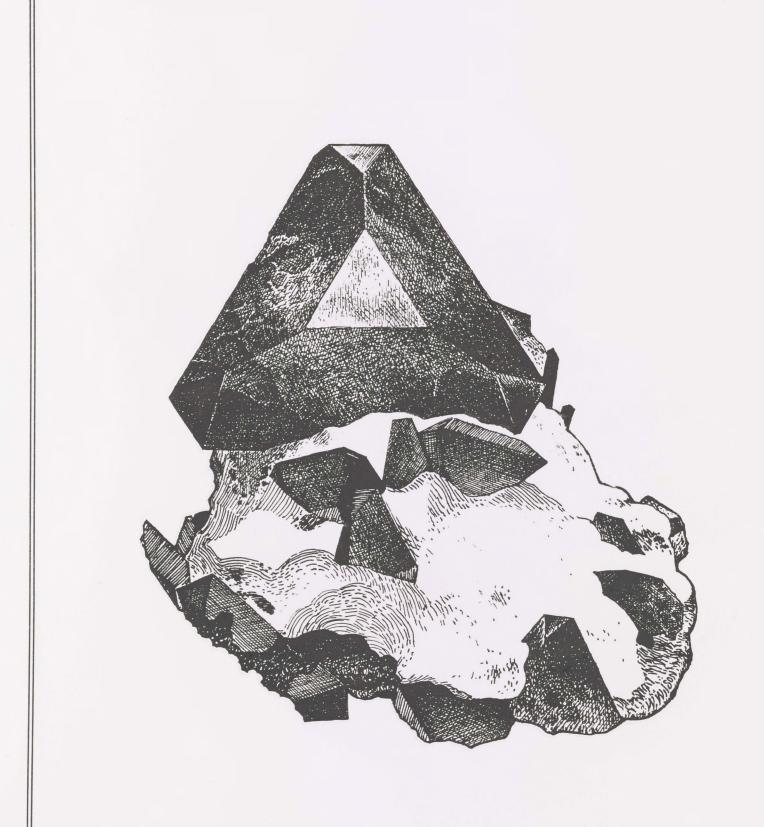

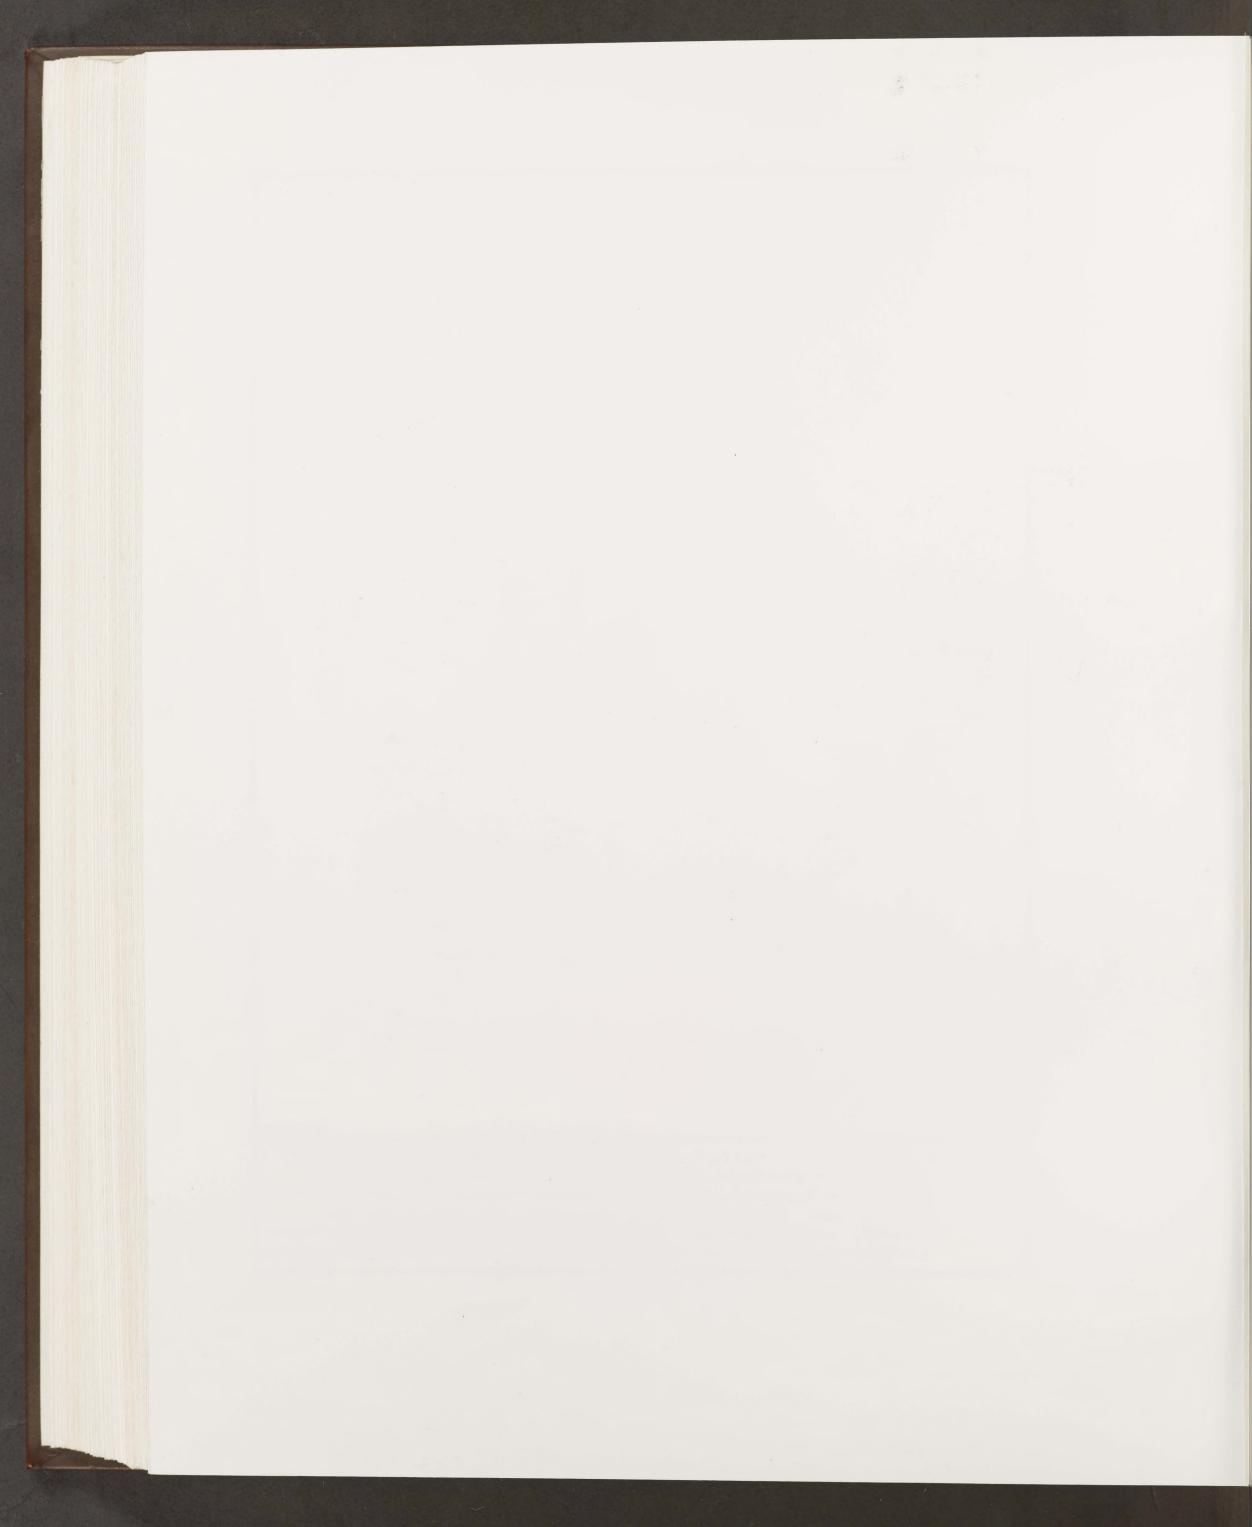

Plate LIV. The "Bancroft Rhodochrosite," Sweet Home mine, Alma, Colorado. Originally owned by Peter Bancroft in the early 1970's, it was purchased by Dave Wilber, who commissioned this drawing for his ad. I also made an oil painting of this specimen for Dave, who later sold it to Bill Larson. Drawing used in vol. 5, no. 6.

a) Fa) 1971

Plate LV. Benitoite crystal, 3 cm across and "triply terminated," from the Benitoite Gem mine, Colifornia (vol.5, no.6, inside front cover). Drawing commissioned by Dave Wilber for his ad. This specimen, arguably the finest for the species, was donated by Dave to the California Federation of Mineral Societies in 1976. See cover of vol. 8, no. 6, for photo.

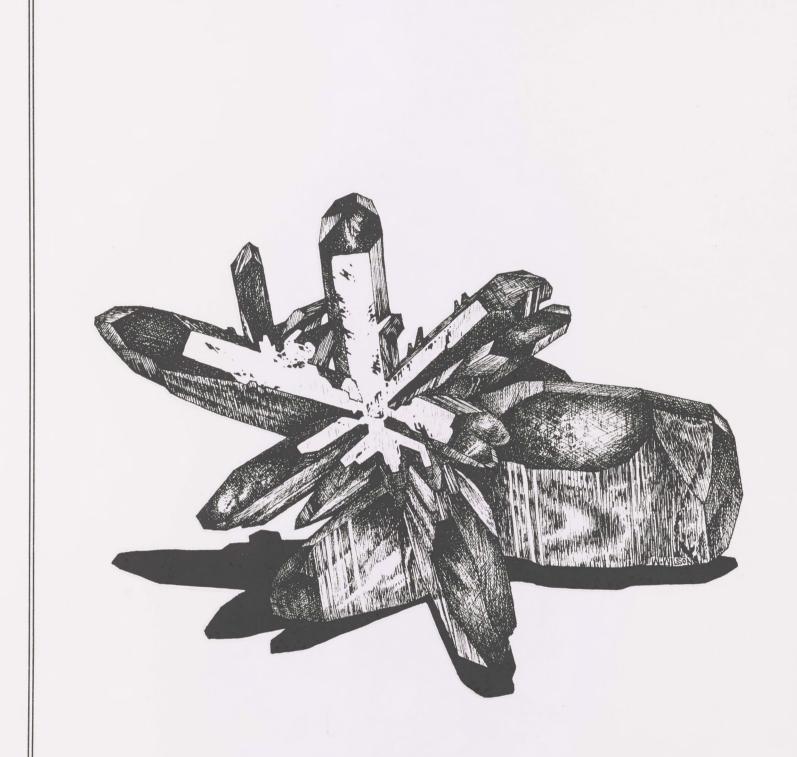

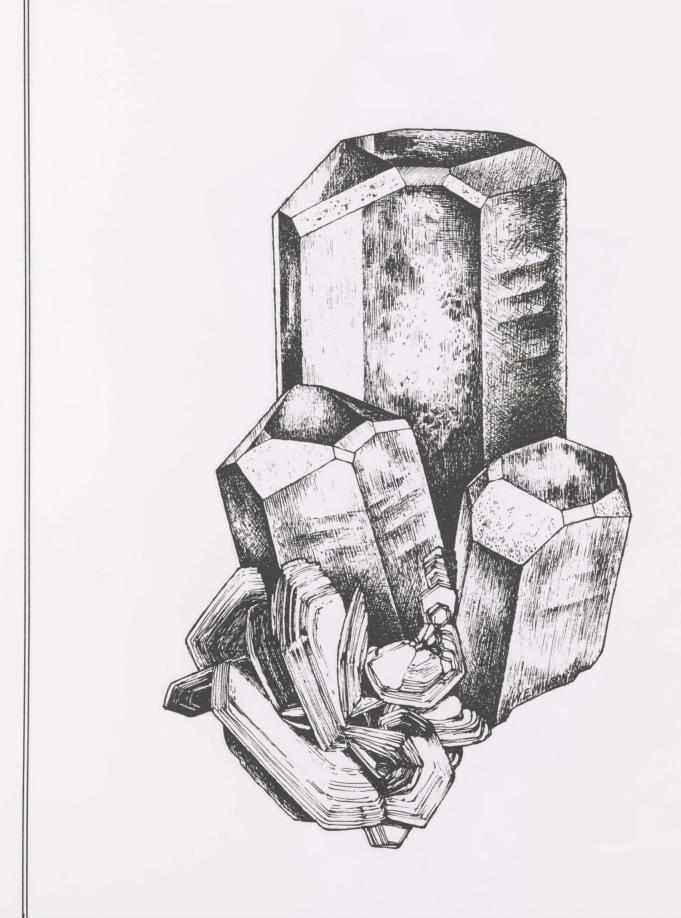

Plate LVI. Cerussite, Tsumeb mine, Namibia (vol. 7, no. 4, p. 198).
Commission by Keith Proctor for his ad, based on a photo of one of his specimens.

WEW 1975

Plate LVII. Aquamarine with Muscovite, Minas Gerais, Brazil (vol. 6, no. 2, p.62). Commissioned by Jack Lowell for his ad; drawn from a photo of one of Jack's specimens.

Plate LVIII. "Blue-Cap" Elbaite with Quartz, Tourmaline Queen mine, California. Commissioned by Russell Behnke for his ad (vol. 14, no. 2, p. 108, no. 3, p. 150). The specimen boasts the largest single crystal of any of the blue-caps: 8 inches. This was my fourth blue-cap drawing, and not the best, but it had to be reducible to small size for his ad.

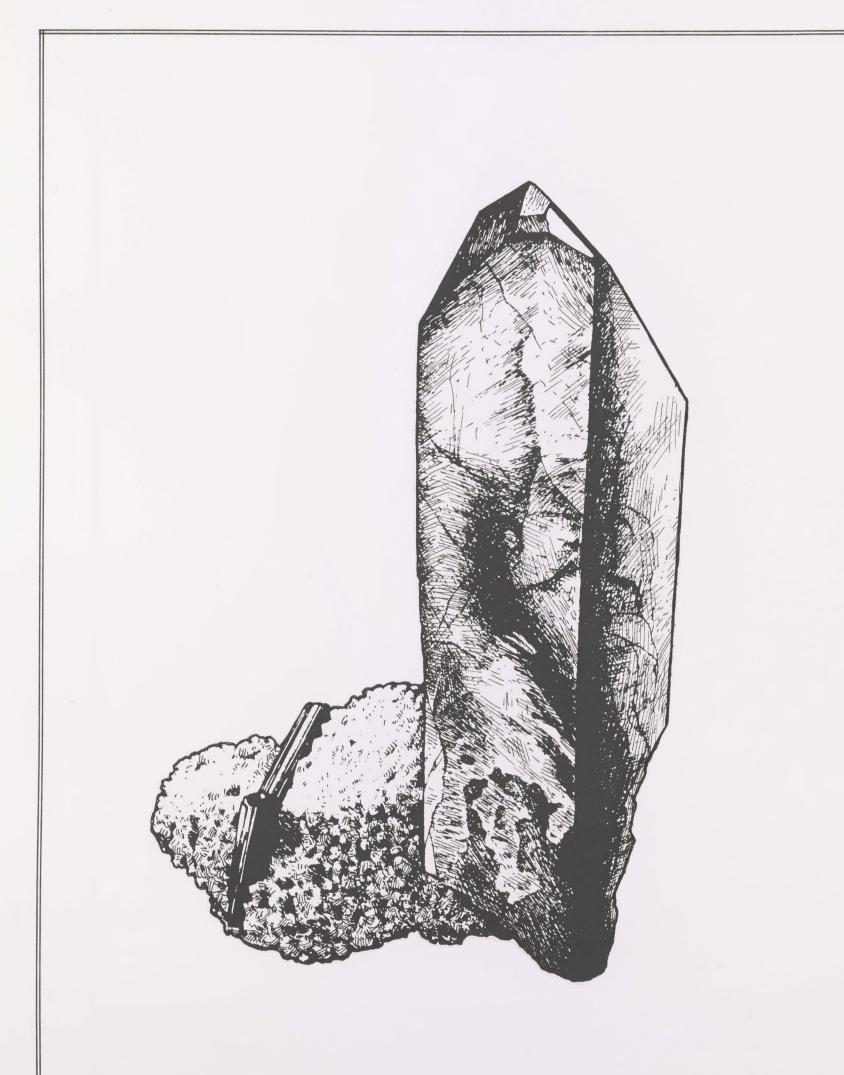

Plate LIX. Hydroxyl-herderite, 14.1 cm, from Virgem da Lapa, Brazil.

Commissioned by John Barlow for his ad (vol. 10, no. 6), from the Van Pelt photo on the cover of vol. 10, no. 1.

WEW 198;

Plate LX. Stibnite, Bolivia (vol. 12, no. 6, p. 376). Commissioned by Mitch Abel for his ad, base on one of his own specimens.

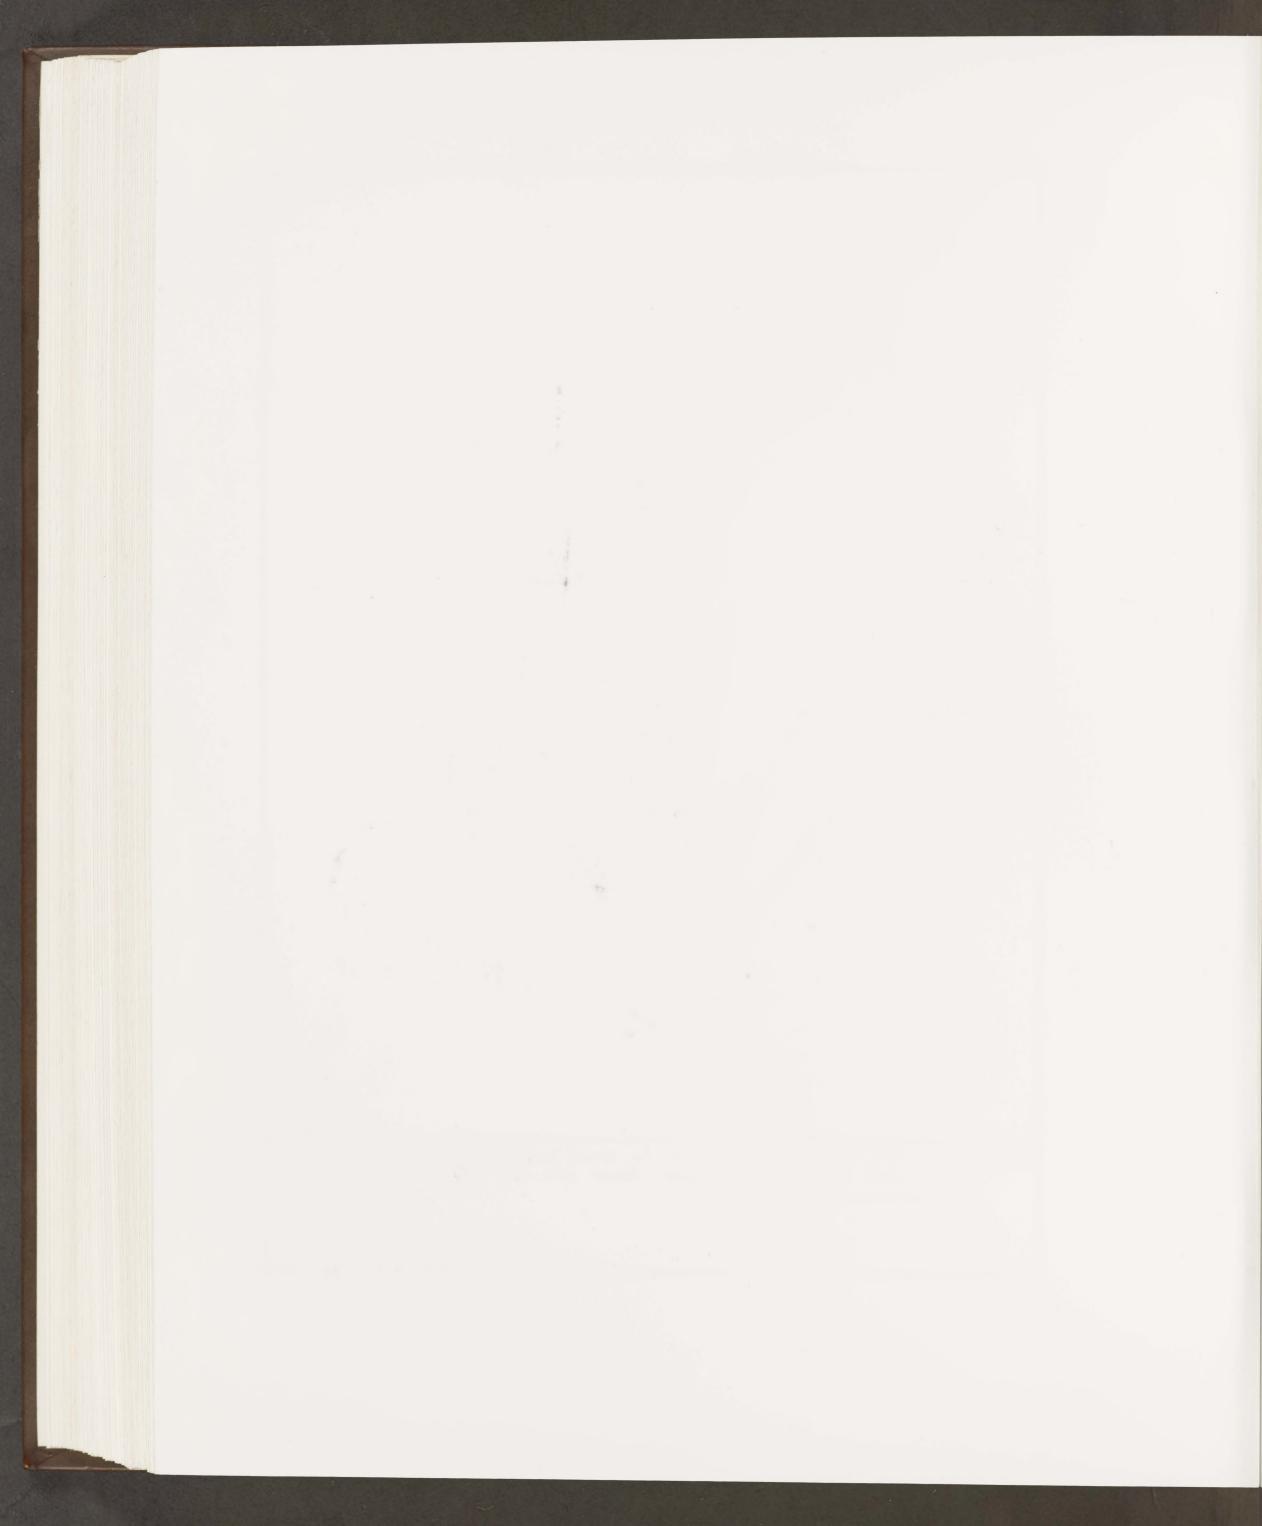

Plate LXI. A trio of my own specimens: Vanadinite, Mibladen (left), Elbaite, Cruziero mine, Brazil (top right) and Benitoite from California. This drawing was used on subscription fliers and in ads for the the magazine in Rock & Gem, Lapidary Journal, and Gems & Minerals. The tourmaline, which I bought in Brazil in 1972 for \$280, is green with blue caps.

Plate LXII. Hemimorphite, Ojuela mine, Mexico. An invented specimen based on several real pieces. Commissioned by Bill Panczner for his ad (vol. 13, no. 6, p. 346).

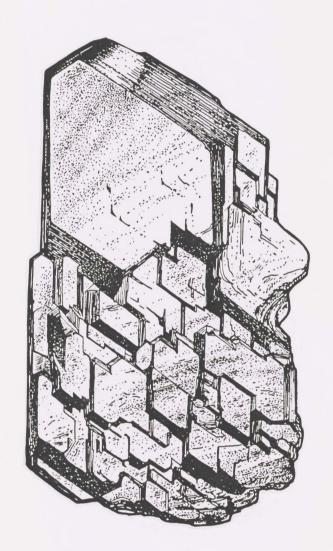

Plate LXIII. Vivianite, Morococala, Bolivia (vol. 15, no. 4, p. 229).

Commissioned by Jack Lowell for his ad; drawn
from the actual specimen loaned by Jack.

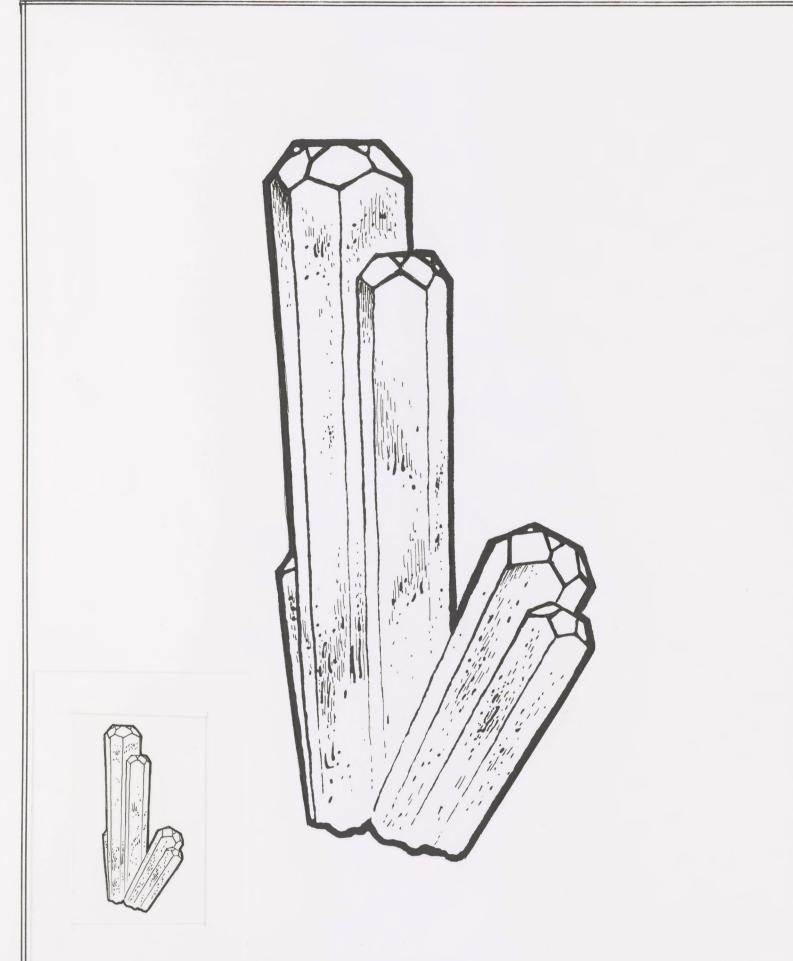

Plate LXIV. Aquamarine, (enterville, Idaho (vol. 16, no. 3, p. 257).

Commissioned by Geary Murdoch for use in his ad,
based loosely on his specimen illustrated in vol. 12,
no. 3, p. 181. Originally drawn small (left) so as to
need no reduction to fit in his small ad.

Plate LXV. Wulfenite, Tombstone, Arizona (Vol. 21, no. 1, p. 12).

Drawn gratis for Dick Morris and Mark Hay's ad regarding their Tucson Show motel sales room. Published with process-yellow color on the crystals in later years.

Plate LXVI. Wulfenite, Red Cloud mine, Arizona (vol. 3, no. 5, p. 240). Drawn from a specimen in the Smithsonian Collection. Commissione by Gene Schlepp for us in his ad - he used it for many years thereafter.

Plate LXVII. Wulfenite, Red Cloud mine, Arizona. Handcolored version of the previous plate, intended for a color ad but never used.

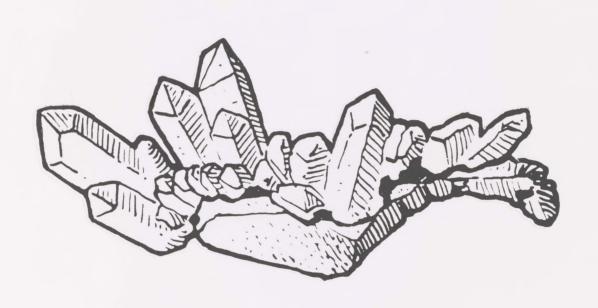

Plate LXVIII. Silver crystals on Copper, Keweenaw Peninsula, Michigan. Drawn gratis for Don Pearce's ad. An invented specimen. (vol. 18, no. 3, p. 236)

Plate LXIX. Gold crystals from California, drawn from actual specimens for Wayne Leicht's article on California gold in Vol. 13, no. 6. Top two: Placer County. Lower left: Mariposa County. Lower right: El Dorado County.

Plate LXX. Gold nuggets and arrowheads. Drawn for my article on Lost Mines of Arizona in vol. 14, no. 5. From real Arizona gold nuggets in the Univ. of Arizona Mineral Museum, and real Apache arrowheads in the collection of the Univ. of Arizona History and Anthropology collection.

Plate LXXI. The "Silver Table," St. Georg mine, Saxony, in 1477. Redrawn from an old engraving for better quality (vol. 25, no.6, p.16).

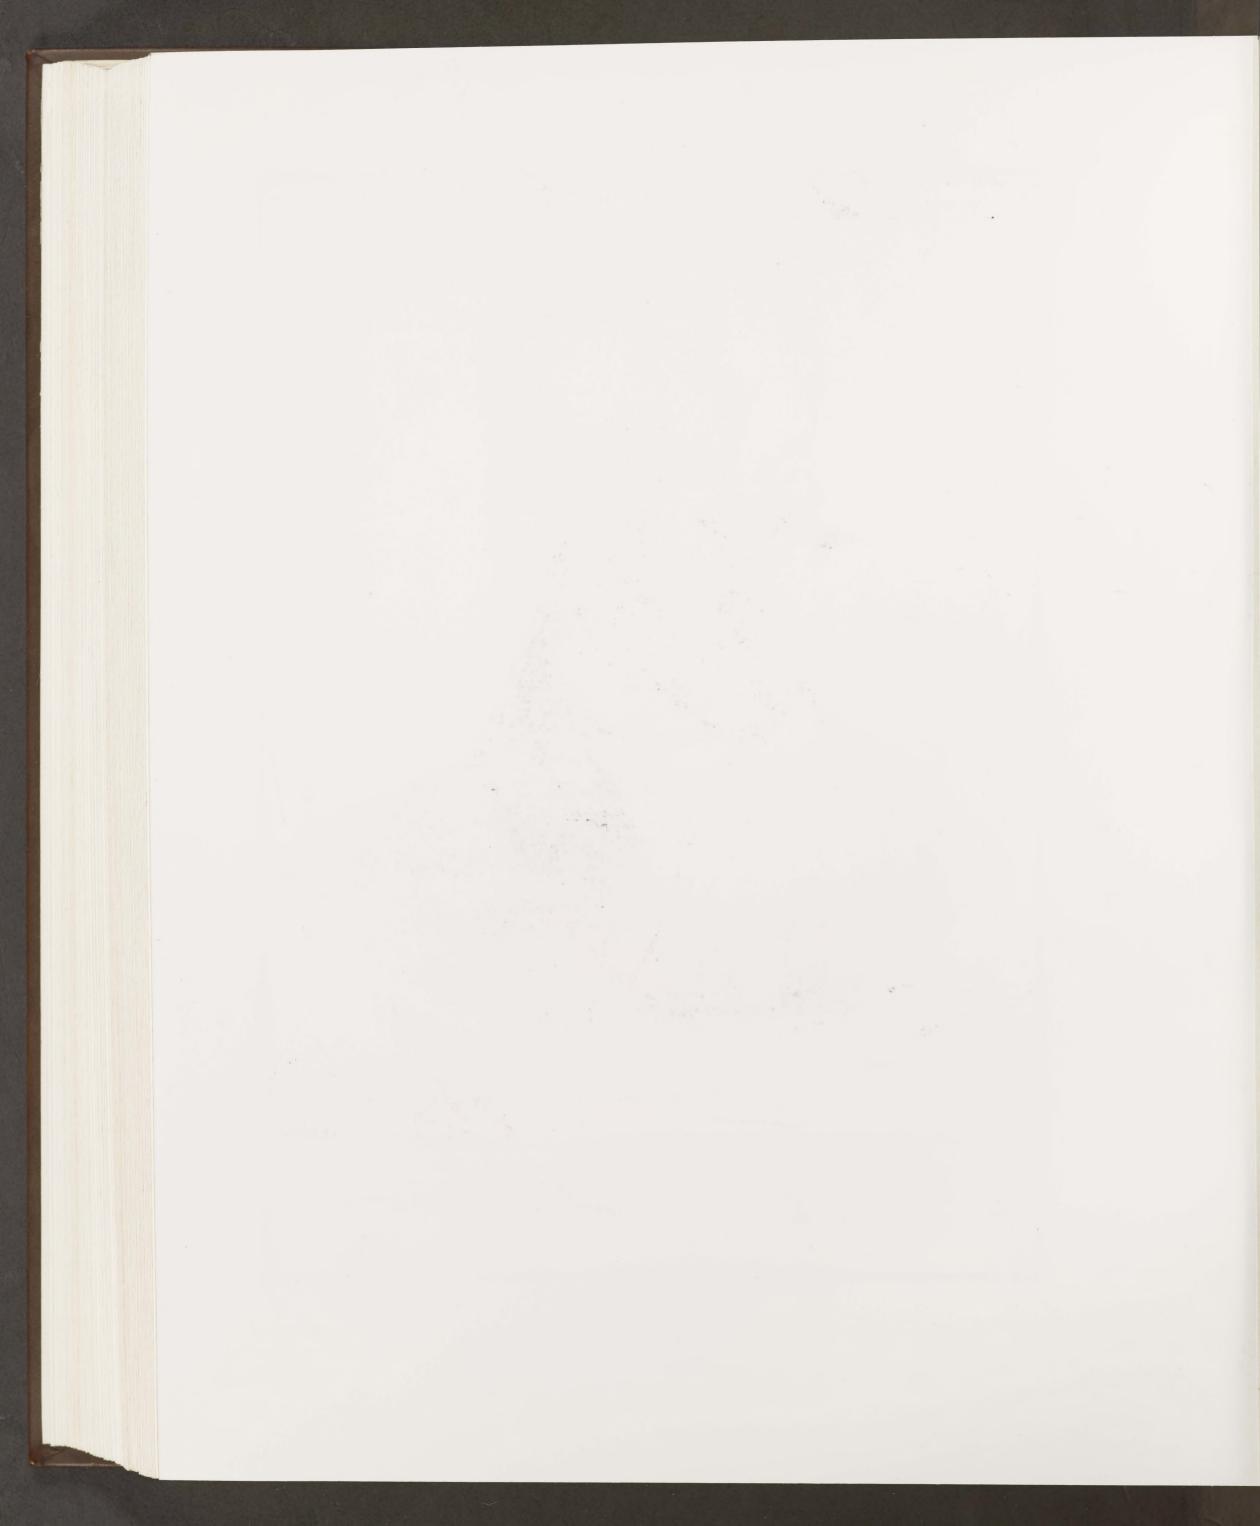

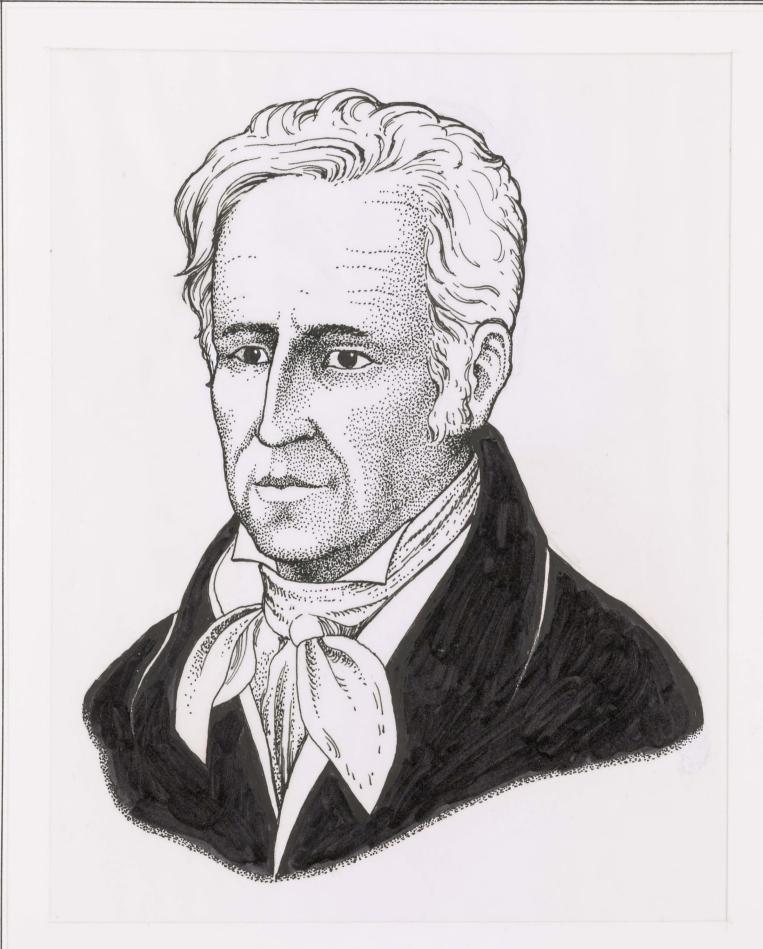

Plate LXXII. Jean Baptiste Louis Romé de l'Isle (1736-1790), famous French crystallographer and mineral collector (vol. 25, no. 6, p. 52). Drawn from an old Russian engraving.

Plate LXXIII. Fausto de Elhuyar y Zubice (1755-1833), famous Spanish chemist and mineralogist; discoverer of tungsten. Drawn from an old painting for use in vol. 25, no. 6.

WEW 1994

Plate LXXIV. Andrés Manuel Del Rio y Fernandez (1764-1849), famous Spanish-Mexican mineralogist and mineral collector. Drawn from an old painting for use in vol. 25, no. 6.

Plate LXXV. Ignaz Edler von Born (1742-1791), famous
Hungarian mineralogist and mineral collector.
Drawn from an old watercolor painting for use
in vol. 25, no. 6.

Plate LXXVI. Charles Francis Greville (1749-1809), prominent British mineral collector and antiquary. Drawn from an old watercolor painting for us in vol. 25, no. 6.

WEW 199-

Plate LXXVII. Friedrich Wilhelm Heinrich von Trebra (1740-1819), famous German geologist and mineral collector.

Drawn from an old charcoal portrait for use in vol. 25, no. 6.

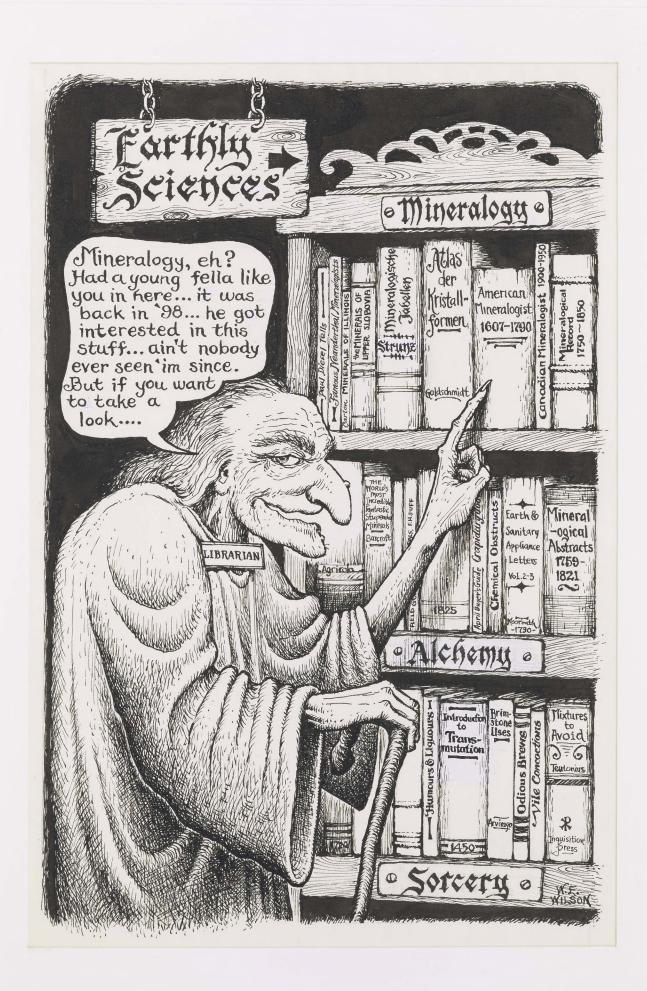

Plate LXXVIII. "The Librarian," drawn for Pete Dunn's article on the description of new mineral species (vol. 8, no. 5, p. 342).

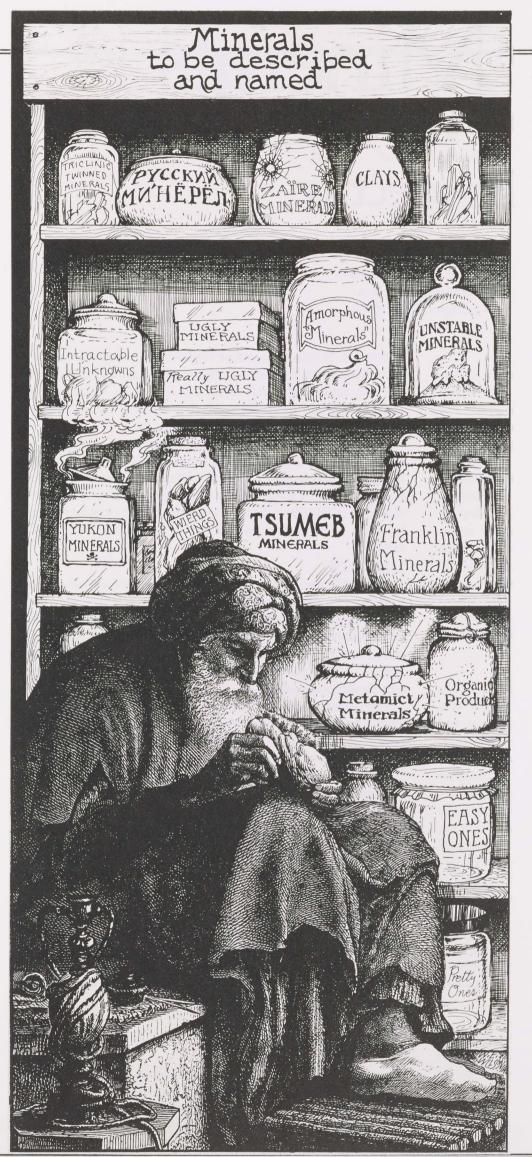

Plate LXXIX. "The Arab Mineralogist," combining an early engraving (the Arab) with a newly drawn cabinet behind, for Pete Dunn's article on new minerals (vol. 9, no. 6, p. 364).

Plate LXXX. "The Smoker," inspired by an old engraving. Drawn to head the book reviews column beginning with vol. 7, no. 2, p. 87.

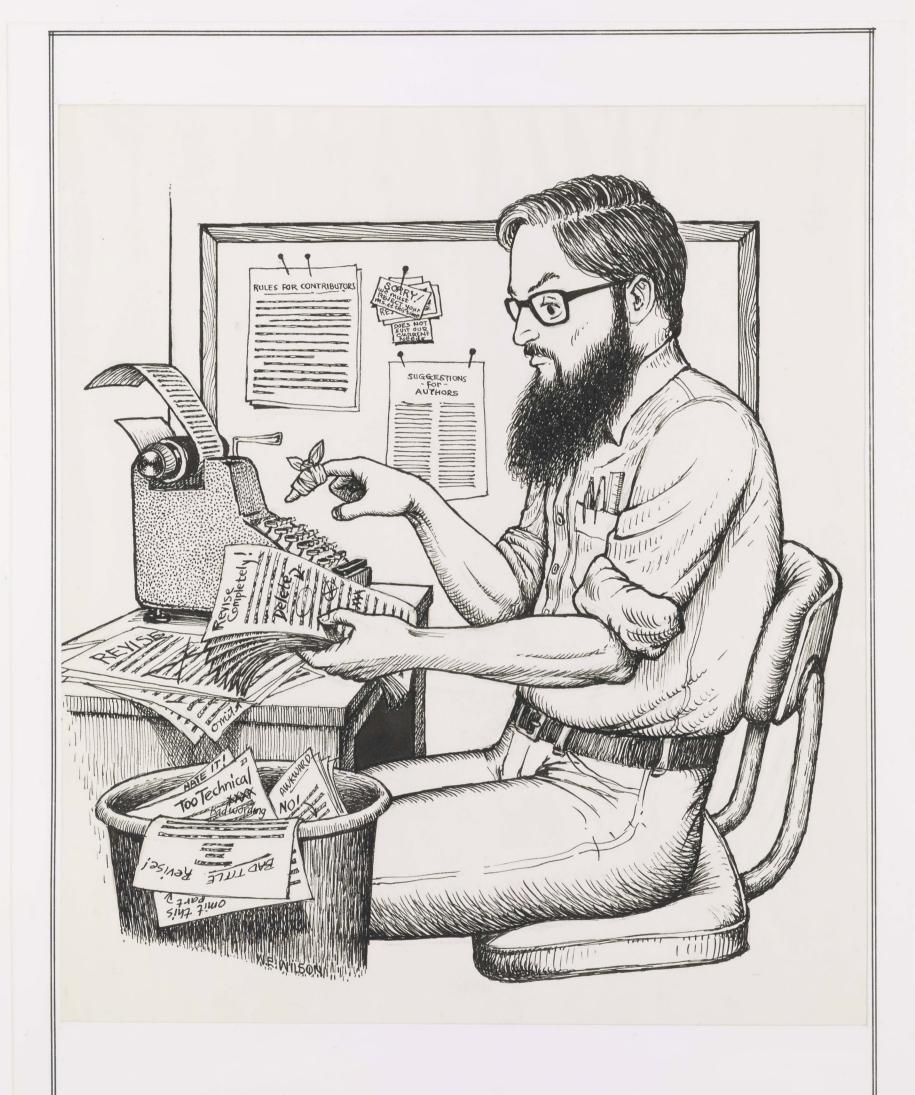

Plate LXXXI. Portrait of (a rather thin-looking) Pete J. Dunn, drawn for his article on the description of new minerals, vol. 8, no. 5, p. 349. (Actually he's never had an article rejected.)

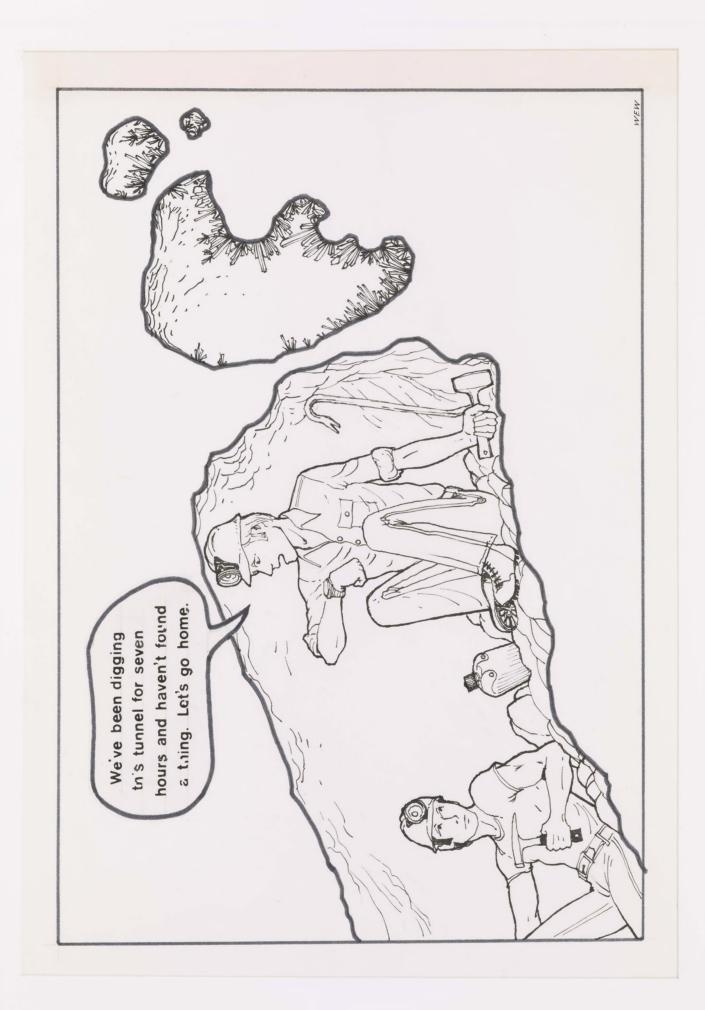

Plate LXXXII. "The Diggers," drawn simply for fun and published as a cartoon in vol. 8, no. 1, p. 31. Modeled after me and my old roommate, John Winston, during our college years.

## GOTCHA!

WEW 1973

Plate LXXXIII. "Gotcha! The Field Collector's Nightmare," based on the paranoia of trespassing to collect in the field. Modeled (v.4,n.2,p.90) after my old college roommate and collecting partner, John Winston.

Plate LXXXIV. "Packing Minerals," drawn to illustrate a collecting story recounting a visit to Los Lamentos, Mexico in 1949, published in vol. 13, no. 5, p. 319.

Plate LXXXV. "Softly to be Posed with Care," published in Miriam and Julius Zweibels ad announcing their move to Greenwich Village. I didn't do much to this old engraving, just added the word "MINERALS" to the box, but I love the image. It was used again years later by a Colorado advertiser.

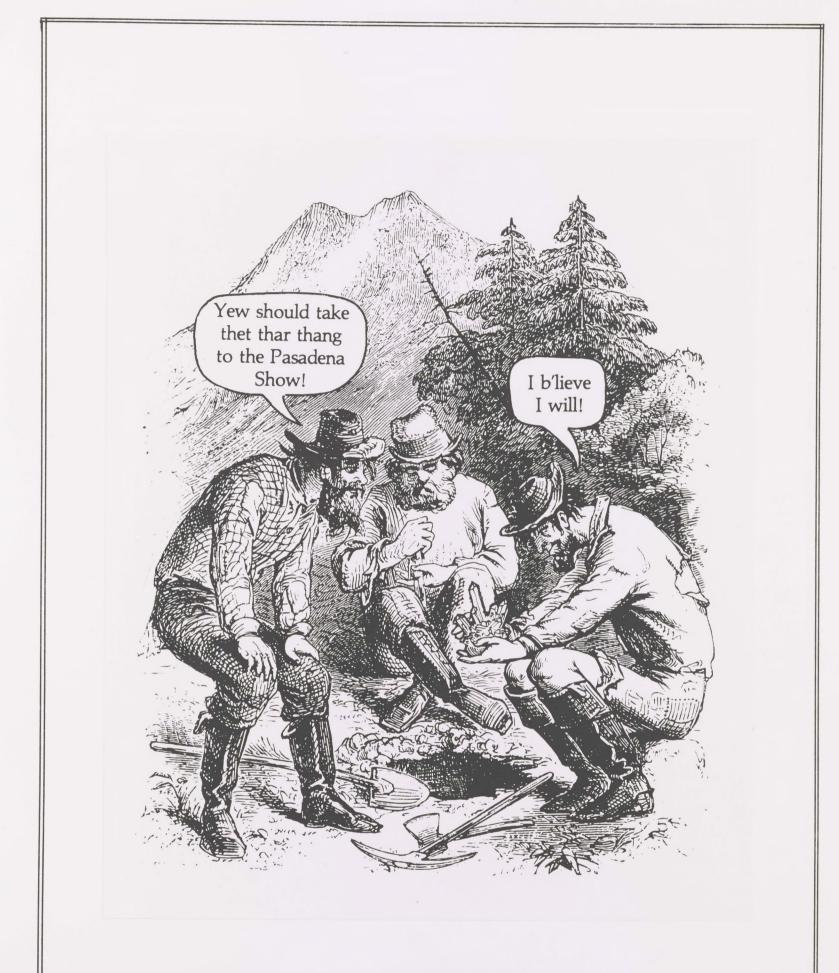

Plate LXXXVI. "The Big Find," published in the ad for the Mineralogical Society of Southern California's 1989 show in Pasadena (vol. 15, no. 5). All I did to this old engraving of prospectors digging for gold is add the crystal specimen in his hands.

Plate LXXXVII. "Paleontologist on the point of a discovery," drawn for Marty Zinn's ad for his Great Western Fossil Show in Tucson (vol. 25, no. 1, p. 19, a handcolored version).

Plate LXXXVIII. "The Collectors," redrawn from an illustration in Gottlieb Tobias Wilhelm's Unterhaltungen aus der Naturgeschichte - Des Mineralreichs (vol. 2., T. 2.), but never used.

Plate LXXXIX. Albertus Magnus (1193-1280), author of De Mineralibus, in his study. I handcolored this old engraving for use in vol. 25, no. 6, p. 14.

WEW 1994

Plate XC. "The Pharmacist and the Physician," a 15th-century engraving which I handcolored for use in vol. 25, no.6, p. 14.
Some of the cannisters contain minerals.

WEW 1997

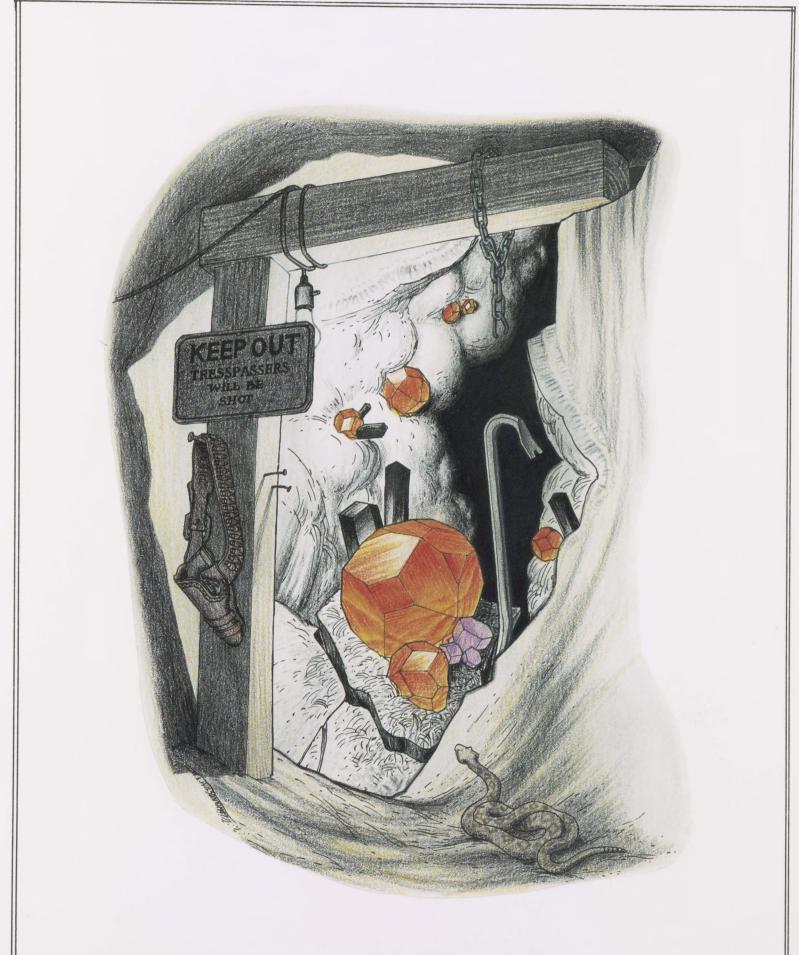

Plate XCI. "Indian Miner, Cerro de Pasco, Peru," an old engraving from Louis Simonin's Life Underground (1869), which I handcolored for use as the frontispiece in our Peru Issue (vol. 28, no. 4, p. 2).

Plate XCII. Francisco Pizarro (1470-1541), an old engraving which I handcolored for use in the Peru Issue (vol. 28, no. 4, p. 11).

WEW 1987

Plate XCIII. "Little Three Mine," pictured in Marty Zinn's ad for the (Tucson) Arizona Mineral and Fossil Show 1993 (vol. 23, no. 6, p. 484).

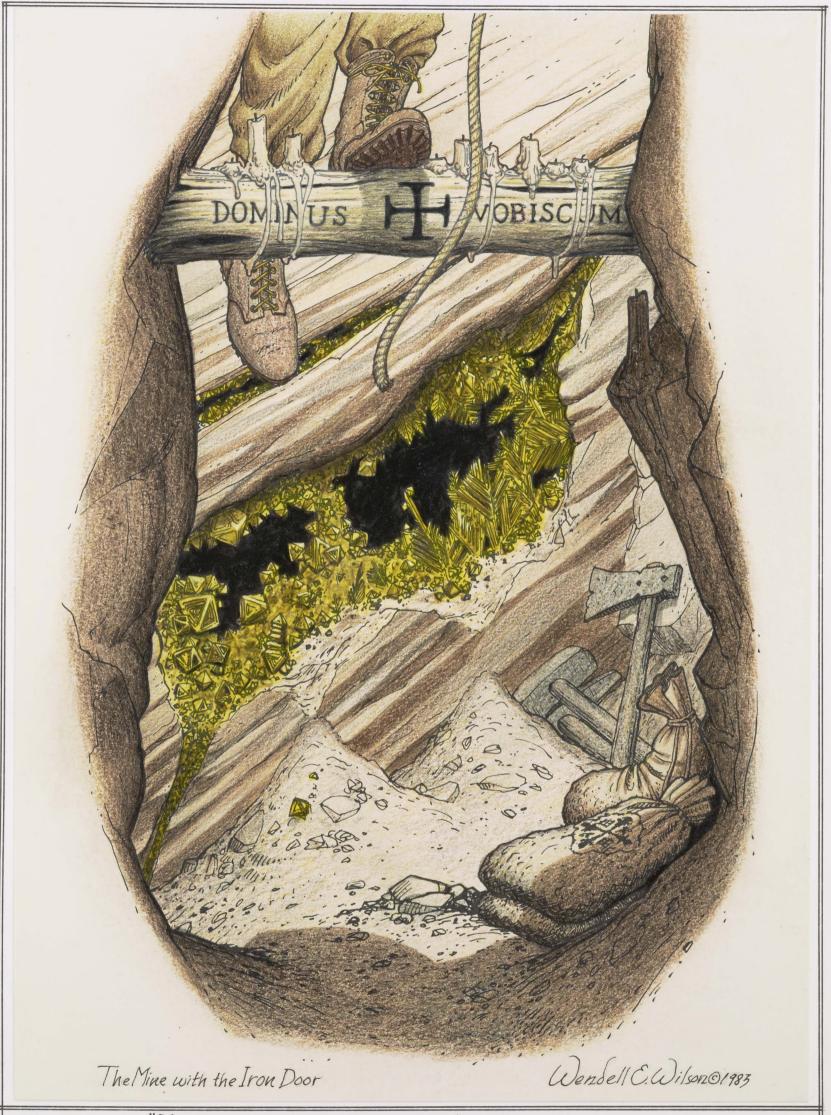

Plate XCIV. "The Mine with the Iron Door," pictured in Marty Zinn's ad for the (Tucson) Arizona Mineral and Fossil Show (vol. 25, no.1, p. 17).

Plate XCV. Schloss Ambras, the castle of Ferdinand II of Tyrol WEW 1994
(1529-1595) where his vast mineral collection was kept.
An old engraving which I handcolored for vol. 25, no. 6, p. 30.

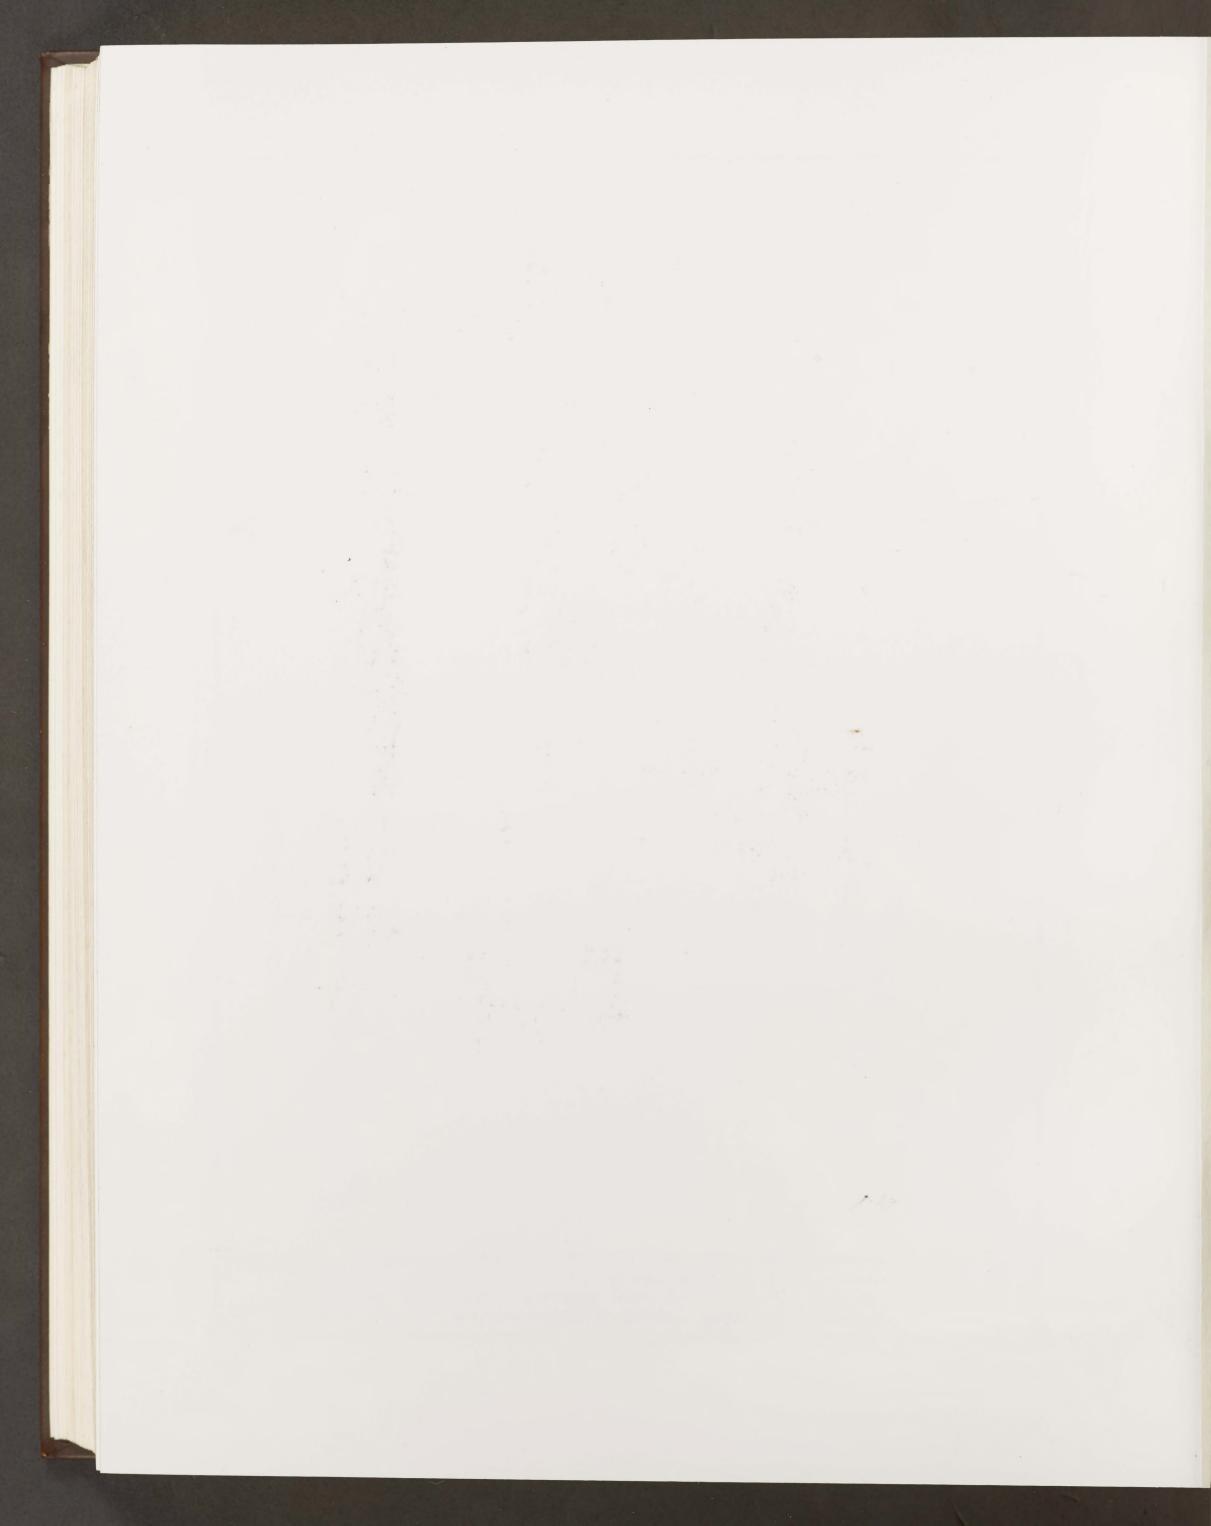

Plate XCVI. Batopilas, Mexico; Ruins of the old mine office. Drawn from an old photo for use in the Silver Issue (vol. 17, no.1, p.70).

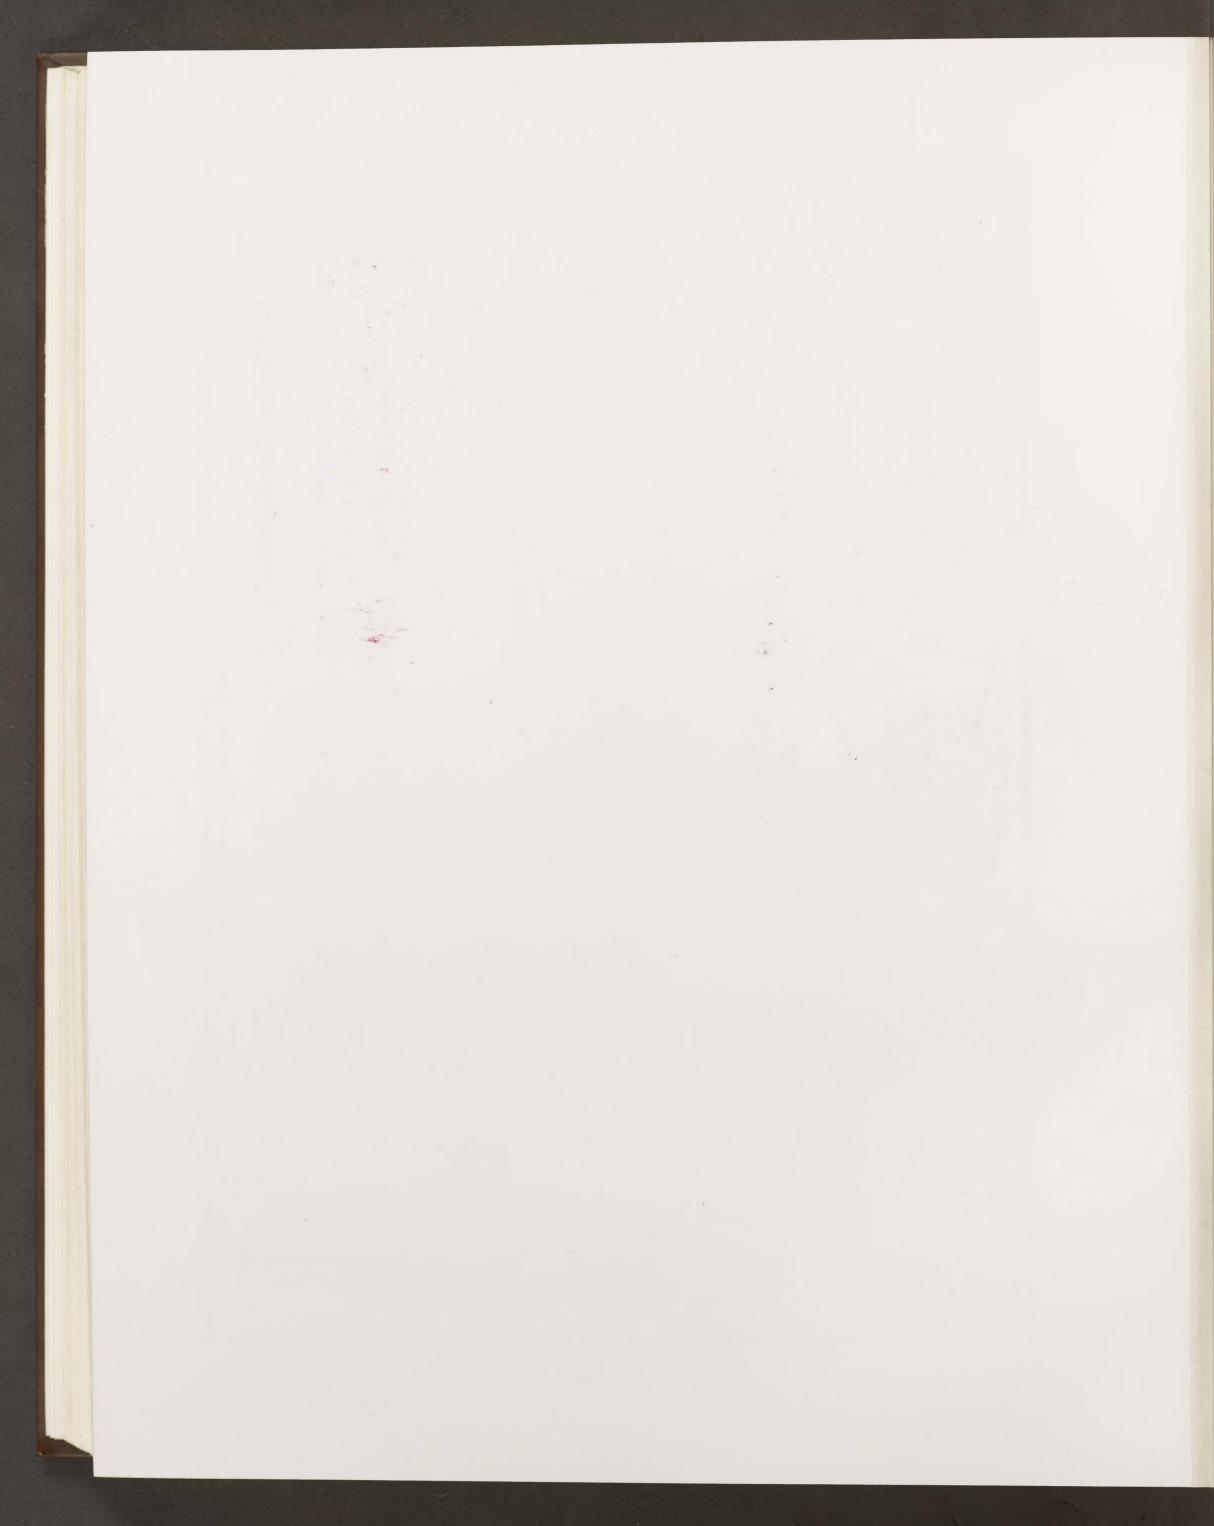

Plate XCVII. Treasury of Maximilian I of Austria in 1515.

An old engraving which I handcolored for use in vol. 25, no. 6, p. 18.

Plate XCVIII. "The Crystallographic Thinker," (vol. 8, no. 5, p. 346).

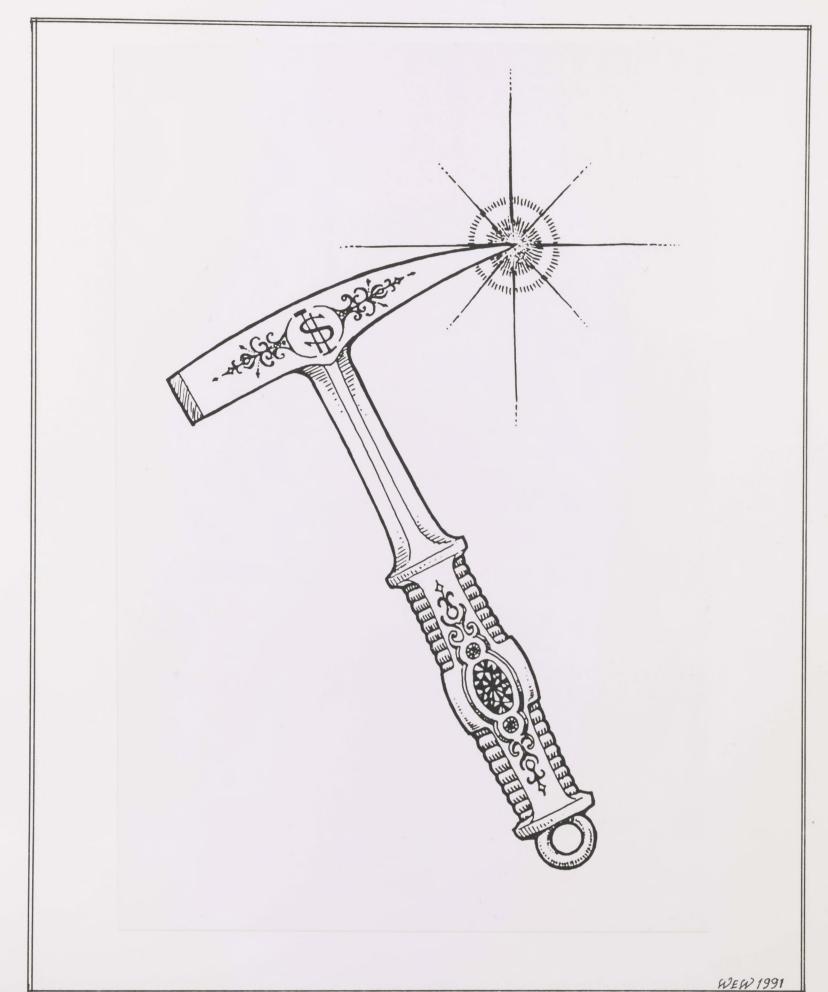

Plate XCIX. "The Silver Pick, "euphemistic tool used by collectors who prefer to buy all of their specimens rather than dig them out of the ground. Published in Marty Zinn's ad for the Costa Mesa Show (vol. 23, no. 2, p.85).

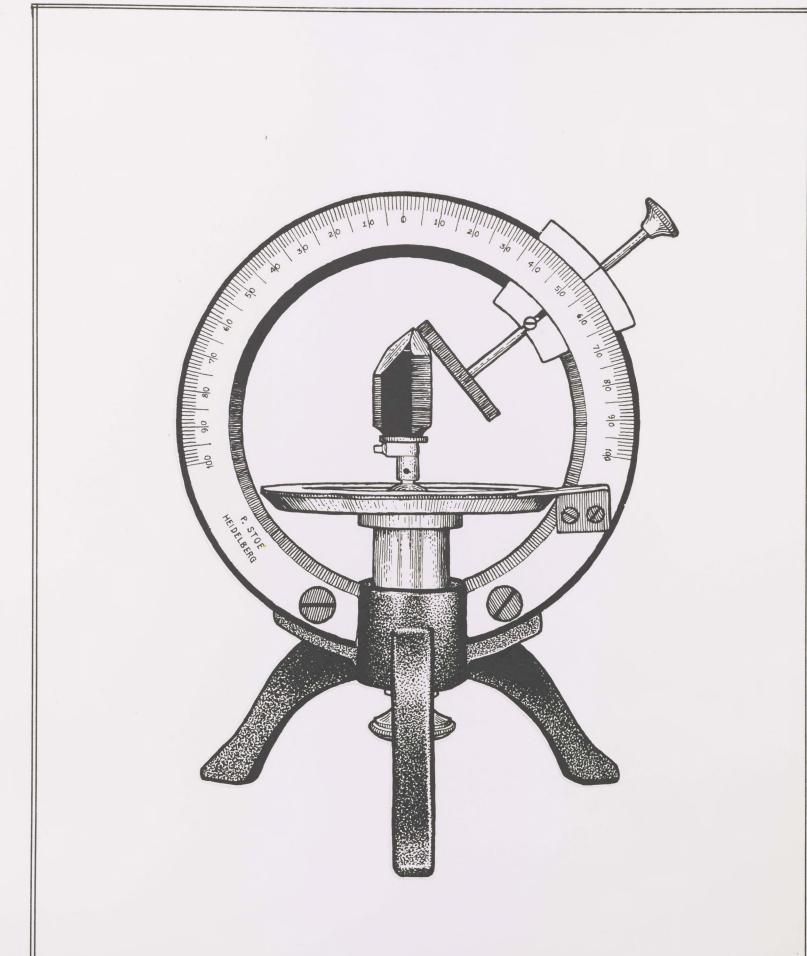

Plate C. "The Goniometer," chosen by John White in 1970 to be our corporate symbol, it has appeared many times in the magazine and has been registered as our trademark.
